How to Apply

**FRONTLINE Plus for DOGS**

**Step 1. OPEN Applicator**
Hold upright with foil side toward you and snap applicator tip.

**Step 2. APPLY FRONTLINE Plus**
Part the dog’s hair between the shoulder blades. Place the applicator tip just above the skin and squeeze. Apply entire contents of the applicator in a single spot directly onto the dog’s skin. Do not apply on top of the hair coat. Avoid contact with treated area until dry. Do not allow your dog to ingest the product. Do not apply to dogs weighing less than 23 lbs. or younger than 8 weeks of age. Do not use more than one application per dog per month.

FRONTLINE® Plus for Dogs:

For use ONLY on DOGS & PUPPIES 8 weeks or older and weighing at least 23 lbs.: Fast-acting, long-lasting, waterproof treatment and control of fleas, flea eggs & larvae, ticks, chewing lice, and sarcoptic mites.

ACTIVE INGREDIENTS
Fipronil:................................................ 9.8%
(S)-methoprene ..................................... 8.8%
OTHER INGREDIENTS........................................ 81.4%
TOTAL .................................................. 100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION

FRONTLINE® Plus for Dogs:

Fleas:
• Kills fleas, flea eggs and flea larvae
• Prevents all flea stages (eggs, larvae, pupae) from developing
• Stops existing infestations and prevents establishment of new infestations
• Kills fleas which may cause flea allergy dermatitis

Ticks:
• Kills all life stages of ticks (larva, nymph and adult), including brown dog ticks
(Rhipicephalus sanguineus), American dog ticks (Dermacentor variabilis), lone star ticks (Amblyomma americanum) and deer ticks (Ixodes scapularis)
• Kills ticks that may transmit Lyme disease, Rocky Mountain Spotted Fever, ehrlichiosis, babesiosis, anaplasmosis and other tick-borne diseases

Lice:
• Rapidly eliminates chewing lice infestations

Mites:
• Aids in control of sarcoptic mange infestations

One spot application is all that's needed:
FRONTLINE Plus spreads from the single point of application, rapidly covering the entire dog and localizing in the hair, on the surface of the skin and in the sebaceous glands. These glands act as a reservoir, continuously replenishing FRONTLINE Plus onto the skin and hair coat, so it keeps working even if the dog gets wet. Fleas, ticks and chewing lice are killed quickly after coming into contact with a treated dog. Fleas and ticks do not need to bite the dog in order to die.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not allow children to apply product. TO PREVENT HARM TO YOU AND YOUR DOG, READ ENTIRE LABEL AND DIRECTIONS BEFORE EACH USE. FOLLOW ALL DIRECTIONS AND PRECAUTIONARY STATEMENTS CAREFULLY. USE ON DOGS ONLY. DO NOT USE ON RABBITS. DO NOT USE ON OTHER ANIMALS.
To kill fleas, flea eggs & larvae, ticks, and chewing lice apply FRONTLINE Plus for Dogs as follows:
• OPEN Applicator
Hold upright with foil side toward you and snap applicator tip.
• APPLY FRONTLINE Plus
Part the dog’s hair between the shoulder blades. Place the applicator tip just above the skin and squeeze. Apply entire contents of the applicator in a single spot directly onto the dog’s skin. Do not apply on top of the hair coat. Avoid contact with treated area until dry. Do not allow your dog to ingest the product. Do not apply to dogs weighing less than 23 lbs. or younger than 8 weeks of age. Do not use more than one application per dog per month.
FRONTLINE Plus is approved for use on all dogs, including breeding, pregnant, and lactating bitches and puppies as young as 8 weeks.
FRONTLINE Plus remains effective even after bathing, water immersion, or exposure to sunlight.

FREQUENCY OF APPLICATION
When used monthly, FRONTLINE Plus completely breaks the flea life cycle and controls tick and chewing lice infestations. Do not reapply FRONTLINE Plus for 30 days.
FRONTLINE Plus kills adult fleas, flea eggs, and flea larvae for up to three months. FRONTLINE Plus also prevents development of all flea stages for up to three months. FRONTLINE Plus can control fleas for up to three months, however, if there is a high risk of reinfestation or if the pet has fleas which may cause flea allergy dermatitis, a once monthly application may be needed.
FRONTLINE Plus kills ticks for at least one month. A once monthly application is recommended where tick control is needed.
FRONTLINE Plus kills all life stages of ticks (larva, nymph and adult). FRONTLINE Plus kills ticks that may transmit Lyme disease, Rocky Mountain Spotted Fever, ehrlichiosis, babesiosis, anaplasmosis and other tick-borne diseases.
FRONTLINE Plus kills chewing lice for at least one month. A once monthly application is recommended where chewing lice control is needed.
FRONTLINE Plus aids in the control of sarcoptic mange infestations. Multiple monthly treatments are recommended for the elimination of mites.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage and disposal of the product in or near waterways.

STORAGE: Store unused product in original container, out of reach of children and animals.

PESTICIDE DISPOSAL. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product in the sink or toilet.
CONTAINER DISPOSAL. If empty: Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

FIRST AID
Have the product container or label with you when calling a poison control center or doctor. Before calling a poison control center or doctor, or going for treatment, have the product container or label with you when calling a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to a unconscious person.

HAZARDS TO HUMANS.
CAUTION.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS. CAUTION.

If your dog has an unusual reaction to the initial application, consult a veterinarian before repeating treatment. Certain medications can interact with pesticides. Consult a veterinarian before using on medicated, debilitated or aged animals. Call 1-800-660-1842, Monday-Friday, 8am-8pm EST.

HAZARDS TO DOMESTIC ANIMALS.
For external use only. Do not use on puppies under 8 weeks of age and 23 lbs. Individual sensitivities, while rare, may occur after using any pesticide product.

SIDE EFFECTS: Dogs may experience some temporary irritation at the site of application. If signs persist or become more severe within a few days of application, consult a veterinarian immediately.

HANDBOOK OF INFORMATION

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

How to Apply

FRONTLINE Plus for Dogs

Step 1. To REMOVE Applicator:
1. Use scissors to separate one blister.
2. Use scissors to cut along dotted line.
3. Peel down foil to remove the applicator.

Step 2. OPEN Applicator
Hold upright with foil side toward you and snap applicator tip.

Step 3. APPLY FRONTLINE Plus
Part the dog’s hair between the shoulder blades. Place the applicator tip just above the skin and squeeze. Apply entire contents of the applicator in a single spot directly onto the dog’s skin. Do not apply on top of the hair coat. Avoid contact with treated area until dry. Do not allow your dog to ingest the product. Do not apply to dogs weighing less than 23 lbs or younger than 8 weeks of age. Do not apply to dogs weighing less than 23 lbs or younger than 8 weeks of age. Do not apply to dogs weighing less than 23 lbs or younger than 8 weeks of age.

FRONTLINE Plus is a once monthly topically applied product. To prevent HARM to you and your pet, read ENTIRE LABEL and product insert prior to each application. FRONTLINE Plus proprietary combination of Fipronil and -methoprene provides effective treatment and controls fleas, ticks, lice, and chewing lice on dogs for 24 hours or until product is ingested.

FRONTLINE Plus kills all life stages of fleas (larvae, nymphs, and adults). It also kills ticks for at least one month. A once monthly application is recommended where tick control is needed. It is effective against all stages of ticks (larvae, nymphs, and adults). It is effective against ticks that may transmit Lyme disease.

FRONTLINE Plus kills all life stages of ticks (larvae, nymphs, and adults). It is effective against all stages of ticks (larvae, nymphs, and adults). It is effective against ticks that may transmit Lyme disease.
FRONTLINE® Plus for Dogs is:
• Fast-acting
• Long-lasting
• Waterproof

One spot application is all that's needed:
FRONTLINE® Plus spreads from the single point of application, rapidly covering the entire dog and localizing in the hair, on the surface of the skin and in the sebaceous glands. These glands will not be saturated, contradicting statements about "overdosing." FRONTLINE Plus coats the skin and hair coat, so it keeps working even if the dog gets wet.

Fleas, flea eggs & larvae, ticks and chewing lice are killed quickly after coming into contact with a treated dog. Fleas and ticks do not need to bite the dog in order to die.

FRONTLINE Plus for Dogs:
Fleas
• Kills fleas, flea eggs and flea larvae
• Prevents all flea stages (eggs, larvae, pupae) from developing
• Stops existing infestations and prevents establishment of new infestations
• Kills fleas which may cause flea allergy dermatitis

Ticks
• Kills all life stages of ticks (larva, nymph and adult), including deer ticks (Ixodes scapularis), brown dog tick (Rhipicephalus sanguineus), American dog ticks (Dermacentor variabilis) and lone star ticks (Amblyomma americanum).

Lice
• Rapidly eliminates chewing lice infestations

Mites
• Aids in control of sarcoptic mange infestations

FRONTLINE Plus is approved for use on all dogs, including:
• Breeding, pregnant, and lactating bitches
• Puppies as young as 8 weeks and weighing at least 2.3 lbs.
How to Apply

Step 1. To REMOVE Applicator: 1. Use scissors to separate one blister. 2. Use scissors to cut along dotted line. 3. Peel down foil to remove the applicator.

Step 2. OPEN Applicator: Hold upright with foil side toward you and snap applicator lid.

Step 3. APPLY FRONTLINE Plus: Part the dog’s hair between the shoulder blades. Place the applicator tip just above the shoulder blades. Place the applicator tip just above the shoulder blades. Place the applicator tip just above the shoulder blades.

FRONTLINE Plus for Dogs contains a combination of insecticides that kills adult, nymphal, and larval flea stages and prevents the development of flea larvae. In addition, FRONTLINE Plus for Dogs contains a combination of insecticides that kills adult, nymphal, and larval flea stages and prevents the development of flea larvae. Treatment is necessary on dogs for at least one month. A once-monthly application is recommended where fleas control is needed.

To kill lice, flea eggs, flea larvae, ticks, and chewing lice apply FRONTLINE Plus for Dogs as follows:

1. Use scissors to separate one blister. 2. Use scissors to cut along dotted line. 3. Peel down foil to remove the applicator.

FRONTLINE Plus for Dogs is approved for use on all dogs, including breeding, pregnant, and lactating bitches and puppies as young as 8 weeks.

FRONTLINE Plus for Dogs is fast-acting and long-lasting. Kills adult, nymphal, and larval flea stages and prevents the development of flea larvae. Treatment is necessary on cats for at least one month. A once-monthly application is recommended where fleas control is needed.

FRONTLINE Plus for Cats contains a combination of insecticides that kills adult, nymphal, and larval flea stages. Treatment is necessary on cats for at least one month. A once-monthly application is recommended where fleas control is needed.
FRONTLINE® Plus for Dogs is:
• Fast-acting
• Long-lasting
• Waterproof

One spot application in all that's needed:
FRONTLINE® Plus spreads from the single point of application, rapidly covering the entire dog and localizing in the hair on the surface of the skin and in the sebaceous glands. The spread out on the skin increases dramatically with movement, allowing for up to 98% of the application to spread onto the skin and hair coat, so it keeps working even if the dog gets wet.

Fleas, flea eggs & larvae, ticks and chewing lice are killed quickly after coming into contact with a treated dog. Fleas and lice do not need to bite the dog in order to die.

FRONTLINE® Plus for Dogs:
Fleas
• Kills fleas, flea eggs and flea larvae
• Prevents all flea stages (eggs, larvae, pupae) from developing
• Stops existing infestations and prevents establishment of new infestations
• Kills fleas which may cause flea allergy dermatitis

Ticks
• Kills all life stages of ticks (larvae, nymphs and adults), including deer ticks (Ixodes scapularis), brown dog ticks (Rhipicephalus sanguineus), American dog ticks (Dermacentor variabilis) and lone star ticks (Amblyomma americanum).

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS.** CAUTION. Harmful if swallowed. Causes eye irritation. Avoid contact with skin, eyes or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

**HAZARDS TO DOMESTIC ANIMALS.** For external use only. Do not use on puppies under 8 weeks of age and 5 lbs. for small dogs, 23 lbs. for medium dogs, 45 lbs. for large dogs, and 89 lbs. for extra-large dogs. Individual sensitivities, while rare, may occur after using any pesticide product.

**SIDE EFFECTS:** Dogs may experience some temporary irritation at the site of application. If signs persist or become more severe within a few days of application, consult a veterinarian immediately.

If your dog has an unusual reaction to the initial application, consult a veterinarian before repeating treatment. Certain medications can interact with pesticides. Consult a veterinarian before using on medicated, debilitated or aged animals. Call 1-800-660-1842, Monday-Friday, 8am-8pm EST.

**PHYSICAL OR CHEMICAL HAZARDS**

**COMBUSTIBLE:** Do not use or store near heat or open flame.

To successfully control fleas and ticks, all pets must be treated with their own dose of FRONTLINE®.

Apply according to label instructions, ensuring the product is applied to the skin, not on top of the fur and not near the collar. It may be helpful to remove the collar before application, so it doesn’t absorb the product.

Remember, your dog needs to be dry at the time FRONTLINE is applied and remain dry 24 hours after application.

Verify pipette is empty after application (multiple squeezes may be necessary to apply the entire dose).

Even indoor dogs need flea and tick control because you or other pets in the household may bring fleas into the home. These fleas can lead to a flea infestation.

The adult fleas on your pet may just be the tip of the infestation iceberg. It can take up to 3 months to get rid of a serious flea infestation because of all of the flea life stages that existed BEFORE you started using FRONTLINE.

The average flea life cycle in the home is about 21 days long.

- **50% Eggs**: Eggs will hatch in 1-10 days
- **35% Larvae**: The larval stage lasts 5-11 days
- **10% Pupae**: Pupae can survive up to 174 days
- **5% Adult Fleas**: Adult Fleas live up to 120 days

Some tips and other information:

- Verify pipette is empty after application (multiple squeezes may be necessary to apply the entire dose).
- Even indoor dogs need flea and tick control because you or other pets in the household may bring fleas into the home. These fleas can lead to a flea infestation.
To ensure continued protection of your dogs, use these stickers as a reminder to apply and re-purchase FRONTLINE.

After treating your dog for the first time, peel off the sticker and place on your calendar that day.

Place the remaining stickers on your calendar as a reminder to apply FRONTLINE monthly.
