RESTRICTED USE PESTICIDE DUE TO HIGH ACUTE TOXICITY

For retail sale and use only by certified applicators or persons under their direct supervision and only for those uses covered by the certified applicator's certificate.

PERSONAL PROTECTION EQUIPMENT

Applicators and other handlers must wear long-sleeved shirt and long pants, socks, chemical-resistant footwear, and gloves resistant to chloropicrin. Wear goggles or full face shield eye protection.

For handling activities in enclosed areas, applicators and other handlers participating in filling the vase or otherwise exposed to non-encapsulated product must wear:

• an approved air-purifying respirator equipped with high-efficiency particulate (HEPA) air-purifying respirator with N95 or P95 (OSHA approval prefix TC-225) cartridge.

For handling activities outside, applicators and other handlers participating in filling the vase or otherwise exposed to non-encapsulated product must wear one of the following air-purifying respirators:

• A NIOSH certified full facepiece air-purifying respirator equipped with an organic vapor (OV, NIOSH approval prefix TC-225) cartridge and a particulate pre-filter (TYPE/ R, P, or HE, NIOSH approved respirator number TC-225).

• An Agency approved air-purifying respirator approved for organic vapor and high-efficiency particulate material (HEPA) number TC-225.

Do not permit entry into spill or clean-up areas by untrained persons until concentration of chloropicrin is determined to be less than 0.5 ppm.

The manufacturer’s instructions for cleaning/maintaining PPE. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them.

User Safety Requirements

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions were available, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them.

User Safety Requirements

KEEP OUT OF REACH OF CHILDREN

This product is toxic to fish and wildlife. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of waste. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

Restricted Use Pesticide.

This is a fumigant II is a fungicidal solution. When used as directed, it will arrest internal decay present in Douglas-fir, western red cedar and southern pine poles, pilings and similar large timber members in terrestrial sites. Such treatment must be given to prevent internal decay up to six years; however, efficacy is expected to vary from one application to another. Timber known to have internal decay should be scheduled for treatment before it has decayed to the point where replacement is necessary.

Precautionary Statements

Danger: Fatal if inhaled or swallowed. Poisonous liquid and vapor. Corrosive. Liquid causes skin burns and irreversible eye damage. Do not breathe vapor or gas. Do not get in eyes, on skin or on clothing. Chloropicrin is readily identifiable by smell. Exposure to very low concentrations of vapor will cause irritation of eyes, nose and throat. Continued exposure after irritation is evident or higher concentrations may cause painful irritation to the eyes or temporary blindness. Always work with two or more people when applying the formulation. Notify personnel responsible for the safety for the application site before applying to pilings. There are no antidotes for poisoning by chloropicrin. Avoid direct contact with the agent.

Environmental Hazards

This product is toxic to fish and wildlife. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of waste. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Physical or Chemical Hazards

This product may be corrosive under certain conditions. Do NOT USE WATER to clean equipment. Flush equipment with nitrogen, compressed air or solvent. Do not use handling equipment or containers made from magnesium alloy, aluminum or alkali metals. Chloropicrin is a nonflammable liquid.

Storage and Disposal

Do not contaminate food or feed by storage or disposal.

Pesticide Storage: Store in a cool, dry, well-ventilated area away from heat. As a general rule, store in a secure area, out of reach of children. Keep in its original container and tightly closed. Do not use for any other purpose.

Spill and Leak Procedures: Evacuate immediate area of spill or leak. Use SCBA or combination air-supplied/SCBA respirator and protective clothing for entry to affected area to correct problem. Move leaking or damaged container outdoors or to an isolated location, observing strict safety precautions. Work upwind if possible. Allow spilled material to evaporate, or absorb into vermiculite, dry sand, earth or similar absorbent material, which may be disposed of on site, or at an approved disposal facility. Do not permit entry into spill area or clean-up area by unprotected persons until concentration of chloropicrin is determined to be less than 0.05 ppm.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, thoroughly wash all items that may have come in contact with the product with soap and water. Do not contaminate water sources coming into contact with this product.

Properly dispose of any excess product that cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the hazardous Waste Representative at the nearest EPA Regional Office for guidance.

Container Disposal: Refill container with pesticide only. Do not reuse this container for any other purpose.

For additional precautions about this product, please consult the manufacturer’s instructions. Following the manufacturer’s instructions is the responsibility of the person disposing of this product. Before refilling the responsibility of the refiller.
