PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS

CORROSIVE. Causes irreversible eye damage and skin burns. May be fatal if absorbed through the skin. Harmful if swallowed or inhaled. Prolong or frequent skin contact may cause allergic reactions in some individuals. Do not get in eyes, on skin or on clothing. Do not breathe vapor or spray mist. Wear waterproof gloves, safety goggles or face shield, and protective clothing when handling. Wash hands, arms and face thoroughly with soap and water after handling, and before eating, smoking or using the toilet. Remove contaminating clothing and wash before reuse.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to mammals, birds, fish, and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of waste. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. Apply this product only as specified on the label. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. PESTICIDE STORAGE: Store away from food or feed in a secure, well-ventilated area from extreme temperatures. Do NOT STORE BELOW 0 degrees Fahrenheit. Product crystallizes at lower temperatures. Warm or store at higher temperature and mix to redissolve crystals and assure uniformity before use. Do not store in unmarked containers. Keep cool and close when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to the label instructions, contact your State Pesticide or environmental control agency, or the Hazardous Waste Representative at the nearest EPA regional office for guidance. CONTAINER HANDLING: (container 5 gallons or less) Nonrefillable container. Do not puncture or incinerate container. Triple rinse as follows: Fill container ¼ full with water and recap. Shake for 10 seconds. Follow Pesticide Disposal instructions for rinsate disposal. Drain for 10 seconds after flow begins to drip. Repeat procedures two more times. Then offer for recycling if available or reconditioning if appropriate or puncture and dispose of in a sanitary landfill, or by other procedure approved by state and local authorities. (Drum) Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over on to its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available or reconditioning if appropriate or puncture and dispose of in a sanitary landfill, or by other procedure approved by state and local authorities.

USE PRECAUTIONS
READ ALL DIRECTIONS BEFORE USING. Apply this product only as specified on this label. Keep children and pets away from treated wood. Do not store near feed or food. Keep container tightly closed when not in use. This product is toxic to fish. Apply only as specified on this label.

WOODFUME®
A Fumigant for Controlling Decay and Insects in Wood Poles

ACTIVE INGREDIENT: Sodium methylthiodicarbamate (Anhydrous)..........................33.0%
INERT INGREDIENT: ..............................................67.0%
*Contains 3.18 lbs. active ingredient per gallon
TOTAL ..........................................................100.0%

KEEP OUT OF REACH OF CHILDREN
DANGER

READ ENTIRE LABEL FOR PRECAUTIONARY STATEMENTS

PRODUCT INFORMATION
WoodFume is a fumigant solution. When used as directed, it will arrest internal decay present in poles, pilings and large timber members. During sterilization of the treated area, a fungitoxic residue is deposited in the cells of the wood. This residue is effective for an indefinite period. Timber known to have internal decay should be scheduled for treatment before they have decayed to the point where replacement is necessary.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

For remedial treatment of wooden poles/timbers:
1. Drill two holes per gallon using a fumigant drill and large drill bit. Fill the holes immediately after application;
2. Do not treat structures/beams indoors;
3. Do not drill an application hole through seasonal checks to apply product. If the hole intersects a check, plug the hole and drill another. If more than 2 treatment holes intersect an internal void or not pocket, re-drill the holes further up the pole into relatively solid wood.

WoodFume may be applied to any section of a pole or timber where internal decay is suspected. Large structural timbers have so many different end uses that the groundline area of a 36” circumference standing pole is taken as a guide and example for application of this product.

For interior decay, drill four 7/8” diameter holes at a 45° angle downward to a depth of 15’. The first hole should be at or below the groundline and succeeding holes approximately 6-12” higher and rotated 90° from the next lower hole. Pour ¼ pint of the fumigant into all holes.

For interior decay in other size poles, drill an adequate number of holes at a 45° angle downward, sufficiently spaced and of sufficient dimensions to allow for the application of the amount of fumigant in accordance with the table below. Pour equal amounts of the fumigant into all holes. Plug holes with treated wood or plastic plugs, using the precaution of wearing safety goggles or face shield to avoid splashing any of the liquid into the eyes.

Circumference: less than 40” WoodFume: 1 pint
Circumference: 40” – 50” WoodFume: 1.5 pints
Circumference: over 50” WoodFume: 2 pints

For other types of structural members drill an adequate number of holes, sufficiently spaced and of sufficient dimensions to allow for proper distribution of product. Plug holes with treated wood or plastic plugs, using the precaution of wearing safety goggles or face shield to avoid splashing any of the liquid into the eyes.

FIRST AID
If on skin or clothing Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If in eyes Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.

If inhaled Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.

If swallowed Call poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

NOTICE - READ CAREFULLY

CONDITIONS OF SALE: Osmose offers this product for sale subject to, and buyer and all users are deemed to have accepted, the following conditions of sale and warranty which may only be varied by written agreement of a duly authorized representative of Osmose.

WARRANTY LIMITATION: Osmose warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in directions for use on the label subject to the inherent risks referred to below. Osmose makes no other express warranties. THERE IS NO IMPLIED WARRANTY OF MERCHANTABILITY and there are no warranties which extend beyond the description on the label hereof.

INHERENT RISKS: The directions for use on this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks associated with use. Buyer assumes all risks associated with use or application of this product contrary to label instructions or resulting from extraordinary weather conditions.

LIMITATION OF LIABILITY: In no case shall Osmose be liable for special, indirect, or consequential damages resulting from the use or handling of this product and no claim of any kind shall be greater in amount than the purchase price of the product in respect of which such damages are claimed.
