This pesticide is toxic to fish. Do not fish from areas that drain into lakes, ponds, streams, estuaries, oceans or other waters in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS

CHEMICAL HAZARD: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction leading to the generation of heat, liberation of hazardous gasses, and possible generation of fire and explosion. In case of contamination or decomposition, do not reconstitute. If possible, isolate container in open air or well-ventilated area. Avoid filling with large volumes of water, where necessary.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Refill container with 7456 TAB only. Do not re-use this container for any other purpose. Cleaning before refilling is the responsibility of the re-user (Metal or plastic containers). Attach tamper evident device (seals) to all openings, except vents, and return to Nalco Company for refilling.

PESTICIDE STORAGE: Keep container tightly closed. Store in a cool, dry, well-ventilated place. Do not store at elevated temperatures. Do not store in direct sunlight. Do not store at temperatures above 100°F. Do not store in closed vehicle and do not store at temperatures above 100°F. Do not store in direct sunlight. Do not store at temperatures above 100°F. Do not store in closed vehicle.

FINAL CONTAINER DISPOSAL: Clean the container before final disposal contains remaining contents from the following liquid. This product may be used for air washer applications. This product may be used for air washer applications. This product may be used for air washer applications. This product may be used for air washer applications.

F AND THEN COATED WITH AN IMPERVIOUS LACQUER FINISH. This product may be added to the rinse water towers, influent systems such as flow through filters, industrial water scrubbing systems, brewery pasteurizers, sewage systems (septic tanks, leach fields, tank lines, sewers, lagoons, and sewage effluent water) – Not applicable as a biological system. This product may be added to treatment systems either continuously or intermittently as needed. The frequency of feeding and duration of the treatment will depend upon the severity of the problem. BADLY FOILED SYSTEMS must be cleaned before treatment begins.

CONTROL FOR BACTERIA AND FUNGI

INTERMITTENT OR SLUG METHOD - INITIAL DOSE: When the system is noticeably foiled add 0.1 to 1.0 pounds per 1000 gallons (or 12 to 120 ppm) of water in the system. Repeat until control is achieved.

SUSTAINED DOSE: When microbial control is evident, add 0.1 to 0.75 pounds per 1000 gallons (or 12 to 90 ppm) of water in the system every 3 days or as needed to maintain control.

CONTINUOUS FEED METHOD - INITIAL DOSE: When the system is noticeably foiled add 0.1 to 1.0 pound per 1000 gallons (or 12 to 120 ppm) of water in the system.

SUBSEQUENT DOSE: Continuously feed to maintain dosage of 0.1 to 0.75 pounds per 1000 gallons (or 12 to 90 ppm) of water in the system.

CONTROL OF ALGAE

INTERMITTENT OR SLUG METHOD - INITIAL DOSE: When the system is noticeably foiled add 0.1 to 1.0 pounds per 1000 gallons (or 12 to 120 ppm) of water in the system. Repeat until control is achieved.

SUSTAINED DOSE: When microbial control is evident, add 0.1 to 0.75 pounds per 1000 gallons (or 12 to 90 ppm) of water in the system.
