This page contains information about a disinfectant product called CaviCide AF, which is effective against various microorganisms, including Methicillin resistant Staphylococcus aureus (MRSA), Vancomycin resistant Enterococcus (VRE), and SARS associated Coronavirus (SARS-CoV-2). The product is available in a ready-to-use form and can be used for disinfecting a variety of surfaces and environments, including food processing areas, food service establishments, animal quarters, and personal protection surfaces. The product is also effective against HIV-1 and can be used on pre-cleaned environmental surfaces and objects, including blood and body fluids.

The product is designed to be used as a disinfectant, cleaner, and sanitizer. It is effective against a wide range of pathogens, including enveloped and non-enveloped viruses, bacteria, fungi, and mycobacteria. The product is suitable for use in healthcare settings, where high levels of disinfection are required, as well as in homes, schools, and other environments. The product is designed to be user-friendly, with instructions for use provided on the label.

To use the product, it is recommended to follow the instructions on the label, which include applying the solution to surfaces and allowing it to remain in contact with the surface for a specified amount of time. The product is also available in a spray format, which makes it convenient for use in various environments.

The product is safe for use around children and pets, and the manufacturer recommends that it be kept out of reach of children. The product is effective against a wide range of microorganisms, including enveloped and non-enveloped viruses, bacteria, fungi, and mycobacteria. The product is designed to be user-friendly, with instructions for use provided on the label.

Overall, the product is an effective disinfectant, cleaner, and sanitizer for use in healthcare facilities, homes, schools, and other environments. It is recommended for use by healthcare professionals, as well as by families and individuals looking to maintain a clean and healthy environment.
