DISINFECTANT, DEODORIZING AND CLEANING

1. Remove gross filth or heavy soil prior to application of the product. Hold container six to eight inches from surface to be treated. Spray area until it is covered with the solution. Apply 1 to 2 ounces of this product. Let product remain on the surface for 5 minutes. No scrubbing is necessary. Wipe off with a clean cloth, mop or sponge. The product will not leave grit or soap scum.

2. Step one cleaning and disinfecting the floors and walls and rails: Remove water from toby by fomring water over top with a Swab mop applicator. Press swab mop against side of the bowl to remove excess water from applicator. Apply 1 to 2 ounces of this product evenly, allowing sufficient time for product to cover entire surface of bowl for maximum cleaning. Swab bowl completely using a scrub brush or toilet bowl cleaner. Allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes. Using approved AOAC test methods (under Good Laboratory Practices, [GLPs]), in the presence of 5% blood serum and a 1 minute contact time, this product exhibits virucidal activity against:

- HIV-1 (associated with AIDS), Hepatitis B Virus (HBV), and Hepatitis C Virus (HCV)
- Influenza A strain H3N2 (Avian Influenza), and Influenza A strain H5N1 (Avian Influenza) for 1 minute
- Norovirus (Norwalk virus) for 5 minutes
- Rhinovirus type 39 (Rhinovirus) for 1 minute
- Varicella Zoster Virus (Shingles) for 1 minute
- Hepatitis A Virus (Hepatitis A) for 1 minute
- Hepatitis B Virus (Hepatitis B) for 1 minute
- Hepatitis C Virus (Hepatitis C) for 1 minute

3. Step two cleaning and disinfecting the sink: Surface spray surface to be treated making sure to wet completely. Let air dry.

4. Special instructions for cleaning and decontamination against HIV-1, HBV and HCV on surfaces/or objects soiled with blood/body fluids.

- Remove gross filth or heavy soil prior to application of this product.
- Hold container six to eight inches from surface to be treated. Spray area until it is covered with the solution. Apply 1 to 2 ounces of this product. Let product remain on the surface for 5 minutes. No scrubbing is necessary. Wipe off with a clean cloth, mop or sponge. The product will not leave grit or soap scum.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL. PESTICIDE STORAGE – Store in a dry place no lower in temperature than 50°F or higher than 100°F. PESTICIDE DISPOSAL – Pesticides are acutely hazardous, improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. Treated waste cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Protection Agency for proper disposal instructions. Local, State, and Regional Office for assistance. CONTAINER DISPOSAL – Nonrefillable container. Do not reuse or refill container. Clean container promptly after emptying. Triple rinse following disposal instructions for rinsate disposal. Drain for 10 seconds after illness begins to drip. Repeat procedure two more times. Offer for recycling or reconditioning, if available. If not available, puncture and dispose in a sanitary landfill.

First Aid

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice. Have person sip a half glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
