One-Step Disinfectant®
For Hospitals and Institutional Use
Effective in the presence of 5% serum contamination
• Kills SARS-CoV-2 virus, the cause of COVID-19
• Staphylocidal
• Pseudomonacidal
• Bactericidal
• Salmonellacidal
• Fungicidal
• Virucidal

6836-152-82613_ProteX disinfectant spray One-Step Disinfectant_20201102_1_82613_.pdf
USE PROTEX® DISINFECTANT SPRAY

• As a disinfectant on hard, non-porous surfaces:
  - For disinfecting of ultrasound transducers, probes, mammography compressor plates and other hard non-porous surfaces
  - To clean and disinfect tables, chairs and countertops
  - Use on non-porous athletic mats, wrestling mats, gymnastic mats, exercise equipment and training tables

PROTEX® DISINFECTANT SPRAY

Is a one-step Hospital Use disinfectant† cleaner that is effective against a broad spectrum of bacteria, is virucidal* including HIV-1, the AIDS Virus and Hepatitis B Virus and Hepatitis C Virus, and fungicidal when used as directed.

USE IN:
  - Hospitals
  - Medical Related Facilities
  - Athletic Facilities
  - Exercise Facilities
  - Other hard non-porous surfaces made of:
    - laminated surfaces
    - metal
    - plastic
    - stainless steel
    - vinyl and plastic upholstery
    - finished woodwork
  - Vinyl and plastic upholstery
  - Other hard non-porous surfaces of:
    - washable, hard, non-porous surfaces of:
    - washable, hard, non-porous surfaces of:
    - stainless steel
    - vinyl and plastic upholstery
    - finished woodwork

Protex Disinfectant Spray is a one-step hospital use disinfectant; Bactericidal tested according to the current ADAC Use-Dilution Test Method, Fungicidal according to the ADAC Fungicidal Test and Virucidal* tested according to the Virucidal qualification modified in the presence of 5% organic serum against:

Bacteria: Acinetobacter baumannii • Corynebacterium ammoniagenes
  - Burkholderia cepacia • Campylobacter jejuni • Enterobacter aerogenes
  - Enterobacter cloacae NDM-1 • Enterococcus faecalis-Vancomycin resistant
  - VRE • ESBL Escherichia coli • Escherichia coli, New Delhi Metallo-Beta Lactamase
  - MRSA

Viruses: Hepatitis B Virus (HBV) • Hepatitis C Virus (HCV) • Herpes Simplex Virus Type 1 • Herpes Simplex Virus Type 2 • HIV-1 (AIDS Virus) • Human Coronavirus • Influenza Virus Type A / Brazil • 2013 Influenza A Virus (H7N9)
  - Norwalk Virus • Respiratory Syncytial Virus • Rotavirus • SARS-Related Coronavirus 2 (SARS-CoV-2) (cause of Covid-19) • Vaccinia

Fungi: Trichophyton mentagrophytes • Aspergillus niger • Aspergillus fumigatus

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DISINFECTION / *VIRUCIDAL / FUNGICIDAL / MOLD & MILDEW

CONTROL DIRECTIONS:

Spray 6-8 inches from hard, non-porous surface, until surfaces are thoroughly wet. Do not breathe spray. Treated surfaces must remain visibly wet for 10 minutes. For SARS-CoV-2, treated surfaces must remain visibly wet for 3 minutes. For Influenza Virus Type A and Human Coronavirus, treated surfaces must remain visibly wet for 1 minute. Wipe dry with a clean cloth, sponge, or mop or allow to air dry. For visibly soiled areas, a preliminary cleaning is required. Rinse all surfaces that come in contact with food such as countertops, appliances, tables and stovetops with potable water before reuse. Do not use on utensils, glassware and dishes.

For fungicidal activity: Protex Disinfectant Spray is an effective one-step fungicide against Trichophyton mentagrophytes when used on hard non-porous surfaces in areas such as locker rooms, dressing rooms, shower and bath areas and exercise facilities. Allow surfaces to remain visibly wet for 10 minutes.

For mold and mildew: Repeat treatment every 7 days or more often if new growth appears. This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

ULTRASONIC BATH DISINFECTANT / *VIRUCIDAL DIRECTIONS:

Use Protex Disinfectant Spray to disinfect hard non-porous non-critical objects compatible with Ultrasonic cleaning units. Pour Protex Disinfectant Spray directly into bath chamber. Pre-clean visibly soiled objects. Place objects into unit and operate for a minimum of 10 minutes, according to the manufacturer’s directions. Remove objects and wash with sterile water (sterile water for injection) or allow to air dry. Use fresh product for each use.

†KILLS HIV-1 AND HBV AND HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES / OBJECTS PREVIOUSLY SOILED WITH BLOOD / BODY FLUIDS

in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) or Hepatitis B Virus (HBV) or Hepatitis C Virus (HCV).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OR HBV OR HCV ON SURFACES / OBJECTS SOILED WITH BLOOD / BODY FLUIDS.

Personal Protection: Clean up must always be done wearing protective gloves, gowns, masks, and eye protection.

Cleaning Procedure: Blood and other body fluids containing HIV or HBV or HCV must be thoroughly cleaned from surfaces and objects before application of Protex Disinfectant Spray.
One-Step Disinfectant

For Hospitals and Institutional Use

Effective in the presence of 5% serum contamination

- Kills SARS-CoV-2 virus, the cause of COVID-19
- Staphylocidal
- Pseudomonacidal
- Bactericidal
- Salmonellacidal
- Fungicidal
- Virucidal

Contact Time: Leave surface wet for 1 minute (60 seconds) for HIV-1 and 10 minutes for HBV and HCV. Use a 10 minute contact time for disinfection against all other viruses, bacteria and fungi claimed.

Disposal of Infectious Material: Blood, body fluids, cleaning materials and clothing must be autoclaved and disposed of according to local regulations for infectious waste disposal.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Caution. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing the eye. Call a poison control center or doctor for treatment advice. Have the container or label with you when calling a poison control center or doctor, or going for treatment. For general information on product use, etc., call the National Pesticides Information Center at 1-800-858-7378.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Open dumping is prohibited. Store in original container in areas inaccessible to children.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Follow directions for reconditioning or puncture and dispose of in a sanitary landfill, or in incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Refill Directions:
Remove top from empty spray bottle. Uncork cap on refill contents directly into empty bottle until bottle is full. Screw cap on refill and pour contents directly into empty bottle until full. Replace cap. Store for future use. Use product according to label directions.

DISINFECTION / FUNGICIDAL / MOLD & MOLDIER CONTROL DIRECTIONS:
Apply Protectex Disinfectant Spray undiluted to hard, non-porous surfaces, thoroughly wetting the surfaces with a cloth, mop, sponge, sprayer, or by immersion. Treated surfaces must remain visibly wet for 1 minute to kill HIV-1. For Influenza Virus Type A and Human Coronavirus (treated surfaces must remain visibly wet for 1 minute). Wear dry with a clean cloth, sponge, or mop, as desired or air dry. For visibly soiled areas, a preliminary cleaning is required. For spray applications, use a coarse spray device. Spray 6 - 8 inches from surface with a back and forth motion. Avoid breathing spray. Remove all surfaces that come in contact with food such as countertops, appliances, tables and countertops with potable water before reuse. Do not use on: ceramics, glassware, and dishes.

For fungicidal activity: Protectex Disinfectant Spray is an effective one-step fungicide against Trichophyton mentagrophytes when used on hard non-porous surface in areas such as locker rooms, dressing rooms, shower and bath areas and exercise facilities. Allow surface to remain visibly wet for 10 minutes.

For mold and mildew: Repeat treatment every 7 days or more often if new growth appears. This product is not to be used as a terminal sterilant/high level disinfectant.

Effectiveness in the presence of 5% serum contamination:
- Staphylococcal
- Pseudomonas
- Bacterial
- Salmonellaeclial
- Fungical
- Virucial

For sprayer applications, use a coarse spray device. Spray 6 - 8 inches from surface with a back and forth motion. Avoid breathing spray. Remove all surfaces that come in contact with food such as countertops, appliances, tables and countertops with potable water before reuse. Do not use on: ceramics, glassware, and dishes.

For fungicidal activity: Protectex Disinfectant Spray is an effective one-step fungicide against Trichophyton mentagrophytes when used on hard non-porous surfaces in areas such as locker rooms, dressing rooms, shower and bath areas and exercise facilities. Allow surface to remain visibly wet for 10 minutes.

For mold and mildew: Repeat treatment every 7 days or more often if new growth appears. This product is not to be used as a terminal sterilant/high level disinfectant. Therefore, always use this product in a manner consistent with its labeling.

Refill Directions:
Remove top from empty spray bottle. Uncork cap on refill contents directly into empty bottle until bottle is full. Screw cap on refill and pour contents directly into empty bottle until full. Replace cap. Store for future use. Use product according to label directions.

DISINFECTION / FUNGICIDAL / MOLD & MOLDIER CONTROL DIRECTIONS:
Apply Protectex Disinfectant Spray undiluted to hard, non-porous surfaces, thoroughly wetting the surfaces with a cloth, mop, sponge, sprayer, or by immersion. Treated surfaces must remain visibly wet for 1 minute to kill HIV-1. For Influenza Virus Type A and Human Coronavirus (treated surfaces must remain visibly wet for 1 minute). Wear dry with a clean cloth, sponge, or mop, as desired or air dry. For visibly soiled areas, a preliminary cleaning is required. For spray applications, use a coarse spray device. Spray 6 - 8 inches from surface with a back and forth motion. Avoid breathing spray. Remove all surfaces that come in contact with food such as countertops, appliances, tables and countertops with potable water before reuse. Do not use on: ceramics, glassware, and dishes.

For fungicidal activity: Protectex Disinfectant Spray is an effective one-step fungicide against Trichophyton mentagrophytes when used on hard non-porous surface in areas such as locker rooms, dressing rooms, shower and bath areas and exercise facilities. Allow surface to remain visibly wet for 10 minutes.

For mold and mildew: Repeat treatment every 7 days or more often if new growth appears. This product is not to be used as a terminal sterilant/high level disinfectant. Therefore, always use this product in a manner consistent with its labeling.

Refill Directions:
Remove top from empty spray bottle. Uncork cap on refill contents directly into empty bottle until bottle is full. Screw cap on refill and pour contents directly into empty bottle until full. Replace cap. Store for future use. Use product according to label directions.
