### Bug Control

**OFF! BACKYARD PRETREAT**

**Try our complete line of OFF® outdoor products.**

**Take the lead in protecting the outdoors.**

*Kills and repels insects, including Japanese beetles and 110+ other insect pests.*
*Covers up to 16,000 square feet.*
*Kills insects outside the home on outdoor surfaces for up to 8 weeks.*
*Protects trees, shrubs, ornamentals, structures and listed vegetables from insect damage.*
*Just connect to garden hose and spray, Twist & Shoot™ feature delivers a straight stream for taller trees, and a fan pattern for low-lying plants and gardens.*

**Twist & Shoot™ is a trademark of Bonide Products, Inc.**

READ THE ENTIRE LABEL BEFORE USE

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not allow children or pets into the treated area until dry. Do not water the treated area in the point of run-off. Do not make applications during rain. All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

(1) Treatments to soil or vegetation around structures;
(2) Applications to other vegetation;
(3) Applications to building foundations, up to a maximum height of 3 feet.

Other than applications to building foundations, all outdoor applications to Impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as window, doors, and eaves) are limited to spot and crack-and-crevice applications only.

In New York State, this product may not be applied to lawns within 100 ft. of a coastal marsh, or stream that drains directly into a coastal marsh.

Note: This product is non-staining to most home siding, depending on age and cleanliness. Prior to applying this product to areas that may contact home siding (including vinyl siding), test in a hidden area and check in a few hours. If any staining is observed, do not use this product.

Application: Spray as directed—complete coverage is important. Treat when insects begin to appear and repeat treatments to maintain control as needed. Carefully follow all label directions and any limitations of use, such as the amount of spray to apply on Pre-harvest intervals for particular vegetable crops.

Twist & Shoot™ Ready-to-Spray Instructions:

1. Make sure control knob is in "ON" position, then connect to garden hose.
2. Turn water on at faucet. When spraying low-growing plants and small shrubs, twist the control knob right, to the "FAN" position. When spraying taller trees, shrubs and other plants, twist the control knob left to the "STREAM" position for extended reach and more uniform coverage. The product mixes automatically with the water as you spray.
3. To stop spraying, turn control knob lever to the "OFF" position. Turn off water at the faucet and disconnect sprayer from garden hose.

PESTS OUTSIDE THE HOME: Use on ornamental plants next to building foundations and other outdoor surfaces where these pests are active, including porch, buildings, screens, overhangs, window frames, garages, and patios.

See Table 1—Outdoor Surface Barrier Application for use rates and instructions.

<tr>
<td>Ants, Asian lady beetles, Centipedes, Cockroaches, Crickets, Earwigs, Eastern pants caterpillars, Fleas, Forest tent caterpillars, Gypsy moth Larvae, Millipedes, Mosquitoes, Palmetto bugs, Scorpions, Snakes, Spiders, Deer ticks (which may transmit Lyme disease), Waterbugs</td>
<td>1 pt (16 fl oz) treats 3,000 sq ft</td>
<td>For best results, remove any leaf litter or debris from area prior to treating. Cut back branches or vegetation that contact foundation. Rake back mulch and remove any other material that may serve as harborage sites for pests. Apply a continuous 3 ft. band spray to thoroughly and uniformly wet the treated area around the foundation of buildings. Apply as a spot or crack-and-crevice spray to windows, vents, overhangs, doors and other areas to reduce access by crawling insects. Repeat treatment every 8 weeks (2 months), as needed.</td>

**STORAGE & DISPOSAL**

**Pesticide Storage:** Store and transport in upright position. Store only in original container, in a cool dry place inaccessible to children or pets.

**Pesticide Disposal:** *If partly filled* — Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

**Container Disposal:** *If empty* — Non-refillable container. Do not reuse or refill this container unless directions for use allow a different (concentrated) product to be diluted in the container. Offer for recycling, if available.

**PRECAUTIONARY STATEMENTS**

**Hazards to Humans and Domestic Animals**

**CAUTION:** Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

**FIRST AID**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also call 800-558-5252 or contact the National Pesticide Information Center at 800-858-7378 for emergency medical treatment information.

- **If swallowed:** Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a Poison Control Center or doctor. Do not give anything by mouth to an unconscious person.

- **If in eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**Environmental Hazards:** This product is extremely toxic to fish. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.
