

**It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**  
 Do not use in food areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is prepared or facility is in operation. Serving areas are areas where prepared foods are served, such as dining rooms, but excluding areas where food may be prepared or held. Non-food areas are areas such as garbage rooms, lavatories, entrances, vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage areas (after mopping or cleaning). In the home, cover all food processing surfaces and utensils during treatment or thoroughly wash before use. Cover or remove exposed food. Those with asthma or severe allergies should consult their medical professional before using this product and have someone else apply this product.

Avoid contamination of food and foodstuffs. Remove pets and birds and cover fish aquaria before space spraying or surface applications. This product is not for use on humans. Vacate room after treatment and ventilate before reoccupying. Do not allow children or pets to contact treated areas until surfaces are dry.

Remove protective cap, hold container upright and spray from a distance of 12 to 15 inches; 8 to 10 inches for cloth, rug, furniture and mattress. Prior to application, test product on an inconspicuous area to test for unwanted effects (discoloration or bleeding, for example). Spray until surface is damp; do not spray to the point of run-off as over-application may cause damage. This product will not stain surfaces or fabrics where water alone causes no damage.

**Black Flies, Blow Flies, Fruit Flies, Gnats, Houseflies, Mosquitoes, Stomach Flies and Small Flying Moths:** Close all doors and windows and spray room at the rate of 2 to 3 seconds per 1000 cubic feet. Do not spray to all parts of the room, especially windows and other light sources that attract these insects. Keep the nozzle in constant motion. Retreat if reinfestation occurs, but not more than once every two weeks.  
**Cockroaches, Cockroaches, Crickets, Firebrats, Millipedes, Palmetto Weevils, Pillbugs, Scorpions, Silverfish, Spiders, Spiders and Weevils:** Spray into hiding places such as cracks and crevices, behind sinks and cabinets, along baseboards and floors; hiding insects with spray whenever possible. Retreat if reinfestation occurs, but not more than once every two weeks.

**Ants:** Spray trails, nests and structures' points of entry. Spray on ants whenever possible and retreat if reinfestation occurs, but not more than once every two weeks.

**Carpet Beetles:** Spray directly on beetles, floors, baseboards, shelves and carpets. Retreat if reinfestation occurs, but not more than once every two weeks.

**Bed Bugs:** Spray mattresses, particularly around lumps and seams. Take beds apart and spray into all joints. After mattress is dry, cover with mattress cover and sheet; do not use mattress without cover. Treat baseboards, moldings and floors. Retreat if reinfestation occurs, but not more than once every two weeks.

**To Control Carpet Beetles and Clothes Moths on wood and other proteinaceous fibers:** Remove infested articles from storage, thoroughly brush them or for several hours in sunlight, if possible. Apply spray to empty chests, closets, bureaus and other storages directing the spray into cracks, joints and crevices. After airing, infested articles may be lightly sprayed, keeping nozzles at least three feet from fabric to avoid staining.

**To Control House Dust Mites (Demodex species spp.):** This product controls house dust mites. Bed may cause asthma, rhinitis, watery eyes and sneezing. Use treatment beds up to 8 weeks. Vacuum entire area once spray has dried. Since vacuuming does dust up in the air, those with allergies should have another person vacuum or wear a dust mask and use a vacuum with a high efficiency particulate (HEPA) filter. **Upholstery:** Prior to use on upholstered furniture, test the fabric in an inconspicuous place to ensure dyes will not bleed. Hold container upright with the nozzle pointed away from you. Depress valve and spray from a distance of 8 to 10 inches. Do not use on delicate fabrics. Allow furniture to thoroughly dry before using. **Carpets:** Spray over entire carpet area. Hold the nozzle approximately 12 to 18 inches from the carpet surface and spray in a sweeping motion. Use an overlapping pattern to ensure total coverage. After application, brush the surface of the carpet with a broom or brush to ensure deep penetration. Allow carpet to completely dry before re-walking the treated area. Drying time may be accelerated by using a fan. **Mattresses:** Spray the top, bottom and sides of mattresses, paying particular attention to lumps and seams. Allow to thoroughly dry before using. After mattress is dry, cover and sheet; do not use mattress without cover.

**Fleas and Ticks (Adults and Larvae):** Remove and thoroughly clean or destroy pet bedding. Spray pet sleeping quarters, bed, entire floor and floor covering, paying special attention to cracks and crevices; around baseboards; and window and door frames. Infested upholstered furniture may also be treated with this product. Test upholstery or drapery fabrics in an inconspicuous place before application.

**To Kill Lice and Louse Eggs:** Spray in an inconspicuous area to test for possible staining or discoloration. Inspect after drying, then proceed to spray entire area to be treated. Hold container upright with nozzle pointing away from you. Depress valve and spray from a distance of 8 to 10 inches. Spray each square foot for three seconds. Allow all sprayed areas to thoroughly dry before use. Spray only those garments and parts of bedding, including mattresses and furniture, that cannot be either laundered or dry cleaned. Do not use on sheets or pillowcases. If lice reinfestations occur on humans, use a product labeled for use on humans.

**In animal quarters and milk rooms for rapid control of Houseflies, Mosquitoes and Small Flying Moths:** Close windows and doors and spray at the rate of 2 seconds per 1000 cubic feet of space. For best results, keep area closed for 10 minutes after spraying; do not re-ventilate in treated area. Ventilate after treatment is completed. Do not contaminate animal feed or water during application.

**For control of Bed Bugs and Mites in poultry houses:** Spray crevices of roost poles, cracks in walls and in nests where the bed bugs and mites hide. Spray to the point of dampness but not runoff.

**For protection against Ticks, including those that may carry Lyme disease, and Mosquitoes:** Apply product as directed below. For further protection, use in conjunction with an insect repellent registered for direct application to the skin and utilize the following primary preventive measures: Avoid areas where the pests are found, wear appropriate protective clothing (light-colored, long-sleeved shirt and long pants tucked into socks) and inspect body daily for ticks. Wear pant cuffs inside the socks or footwear to ensure full protection against ticks.

- Initial Treatment Instructions:**
1. Select a well-ventilated outdoor area protected from wind and lay out the clothing to be treated (as a complete outfit, shirt, trousers and socks).
  2. Hold can upright about 8 to 10 inches from clothing surface and spray with a slow, sweeping motion to lightly moisten the fabric surface.
  3. Continue spraying over entire outfit, until a total treatment time of 60 seconds has elapsed and the outer fabric surface is moist enough to cause a slight color change or darkening. Pay special attention to socks and trousers & shirt cuffs.
  4. Turn over the clothing and treat the other side as directed in steps 2 and 3.
  5. Hang the treated clothing and allow to dry for at least 2 hours (4 hours under humid conditions) before wearing.
  6. One can treats 2 complete outfits. Do not exceed recommended spraying times.

**Retreatment Instructions:**  
 This product contains an active ingredient that actually binds to the fabric being treated, providing residual protection that lasts a minimum of two weeks, and needs up through several months washings. Do not retreat clothing more than once every two weeks. Launder clothing at least once before re-treating. Follow the instructions for actual treatment while retreating articles.

**Storage and Disposal**

Do not contaminate water, food or feed by storage or disposal.  
**Pesticide Storage:** Store in a cool, dry area inaccessible to children and pets and away from heat, sparks and open flame. Do not freeze. **Disposal:** Non-refillable container; do not refill or reuse this container. Do not puncture or incinerate. If empty: Place in trash or other for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-866-836-8855 for emergency medical treatment information.

**Use Site:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **In Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **If Swallowed:** Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**Note to Physician:** May pose an aspiration pneumonia hazard. Contains petroleum distillate.

**Precautionary Statements**

**CAUTION:** Contains petroleum distillate. Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse.

This product is toxic to fish. Do not apply directly to any body of water. Do not contaminate water when disposing of equipment washwaters.

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 120°F may cause bursting.

Contains no CFCs which deplete the ozone layer.  
 Federal regulations prohibit CFC propellants in aerosols.
