PRECAUTIONS AND FIRST AID:
CAUTION. Product can cause moderate eye irritation. For certain individuals, skin irritation may occur. In case of eye contact, rinse with fresh water and seek medical attention. In the case of skin irritation, wash with soap and water and call a physician if irritation persists.

OTHER CAUTIONS: Do not apply directly to water or allow to enter streams or lakes.

STORAGE AND DISPOSAL: Store in original container in an area not accessible to children or pets. Do not reuse container. Rinse after use and wrap in newspaper before disposing in trash.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.

Uses: Mole Relief Liquid Hose End Sprayer effectively rids lawns, flower gardens and other soil areas of Moles, Gophers, Voles, Armadillos and other burrowing animals. Not for use where food is grown.

WHEN AND WHERE TO USE: Apply as directed below where tunnels or cone shaped mounds appear in soil from early spring to late fall. To determine if tunnels are active, flatten tunnels and examine in 24-48 hours. As moles begin to react to Mole Relief Liquid Hose End Sprayer, increased tunneling activity may even be noted. Active tunnels will reappear and should be re-flattened after Mole Relief Liquid Hose End Sprayer is applied.

USING AND CONNECTING SPRAYER:

1. Shake bottle well before attaching water hose to sprayer.
2. With sprayer's valve in the "off" position, securely thread garden hose into connector.
3. Open water faucet with sprayer pointed away from yourself and others.
4. While holding locking tab away with thumb, rotate sprayer's valve to "on" position.
5. Begin applying product and use sprayer's valve to start and stop application as needed.

USE DIRECTIONS:

Note: If soil is dry, water for 15 minutes before applying Mole Relief Liquid Hose End Sprayer.

1. Begin spraying Mole Relief Liquid Hose End Sprayer to area, using a systematic routine to assure full coverage.
2. Areas larger than 50' x 100' may be more effectively treated on successive days (or even with several days in between) in sections roughly one third of the total area, beginning with one farthest from the desired mole exit point.
3. To apply Mole Relief Liquid Hose End Sprayer evenly, occasionally check to see thru bottle stripe to determine usage and amount remaining to be applied.
4. After application, water treated area for 15 minutes to speed penetration of Mole Relief Liquid Hose End Sprayer.
