

**LIQUID FENCE®**  
**Deer & Rabbit Repellent**  
*Granular*  
 Shaker Bottle No Sprayer Needed!

**Directions:** Remove cap and inner seal. Replace cap and tighten. (Rebin and replace inner seal to preserve freshness during storage.)

Apply Liquid Fence® Deer & Rabbit Repellent Granular evenly on and around low-growing flower beds, landscaped ornamental gardens, ground cover and lawns. Vegetation will be protected up to 24 inches in height. Reapply every three to four weeks. Reapply after excessive rainfall. In areas where feeding pressure from deer and rabbits is intense, additional and/or more frequent applications may be needed. This will "train" the animals to avoid your yard!

For protection of vegetation above the height of 24 inches, we recommend using Liquid Fence® Deer & Rabbit Repellent spray.

**How it works...**  
 Homeowners, gardeners, professional landscapers and commercial growers have discovered Liquid Fence stops deer and rabbit damage—NATURALLY!

Unlike other deer and rabbit repellents that require the animals to browse to be effective, Liquid Fence works on scent, so deer and rabbits don't even have to take a bite to be repelled. Because the animals' natural aversion to this scent will never diminish, Liquid Fence DOES NOT have to be rotated with other repellent brands.
