ACTIVE INGREDIENT:
Poly[oxyethylene (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride] ........ 6.0%
OTHER INGREDIENTS: ........................................ 94.0%
TOTAL: .................................................................. 100.0%
EPA Reg. No. 88999-2-84732
EPA Est. No. 88999-IL-01

Stops Algae Growth. Fast Acting.
Algaecide for Ponds and Fountains

VOLUME OF WATER TO TREAT  UNIT OF MEASURE
10 gallons / 38 L  1 ml  ½ tsp
50 gallons / 190 L  5 ml  1 tsp
100 gallons / 380 L  10 ml  2 tsp
300 gallons / 1140 L  30 ml  2 tbsp

• Fast acting
• Stops algae growth

Keep out of reach of children

Made in the USA
Hicho en EE.UU.

Treats up to 1,180 Gallons
NET 4 FL. OZ. (118 ml)
#A20018
Directions For Use: It is a violation of federal law to use this product in a manner inconsistent with its labeling. For ornamental pond use only where all water is contained without any out flow.

ORNAMENTAL POND TREATMENT:
Effectively controls many types of green or green water algae, string or hair algae and blanketweed in ponds that contain live plants. Controls existing algae and helps resolve additional algae blooms. Keeps ornamental ponds and water gardens clean & clear. Can be used in ponds with fish and plants.
Add 1 teaspoon (5 mL) of Algaecide for every 50 gallons (190 L) of pond/fountain water. Thoroughly mix Algaecide into pond/fountain by adding near the pump outflow, water-fall, or aeration device. Algaecide can be mixed in a bucket of pond/fountain water. Repeat dose every three days until algae is controlled. Be prepared to siphon out dead filamentous algae. Once algae growth is under control, add one dose every 5 days. Weekly doses of Algaecide will control growth and reduce pond/fountain maintenance.

Caution: Do not use Algaecide with crustaceans, including crabs, shrimps, freshwater shrimp and freshwater lobsters.

Warm Weather Caution: Before using Algaecide, make certain that the pond has vigorous aeration - i.e., a fountain, waterfall, or other aeration device to avoid fish loss due to low oxygen levels. When algae is removed by the filter or settles to the bottom of the pond/fountain, the oxygen level may drop to a harmful level if adequate aeration is not provided. Therefore when using Algaecide during warm summer months, adequate aeration is required. Do not shut pond pumps and aeration devices off at night.

Compatibility: Algaecide can be used in ponds with live plants. Do not use with crustaceans, including crabs, shrimp and freshwater lobsters.

Environmental Hazards: This product is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL:
Storage: Keep product in tightly closed container when not in use. Store in cool, dry, well ventilated areas away from heat or open flame.

Pesticide Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste facility.

Container Handling: If empty: Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling, if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drains.

FIRST AID

IF SWALLOWED
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water, if able to swallow.
- DO NOT induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

IF IN EYES
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

IF ON SKIN, CLOTHES
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 to 20 minutes.
- Call a poison control center or doctor for treatment advice.

IF INHALED
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for treatment advice.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after use.

PHYSICAL OR CHEMICAL HAZARDS: Mildly corrosive. Do not mix with acids, ammonia, oxidizers, bleach or other household chemicals.

Eliminates existing algae growth.
