Fleas • Ticks • Mosquitoes • Ants • Roaches • Flies • Scorpions • Chiggers • Crickets • Chinch Bugs • Japanese Beetles • No-See-Ums • Gnats • & Repels Venomous Snakes

Safe even when wet. Just spray & play! Safe for use on ornamental trees, shrubs & flowers.

EQUIPMENT: Dial or Pre-Mix Hose-End Sprayer, Compression or Tank Sprayer, Fogger or Misting System

Kill and Prevent Fleas, Ticks, Mosquitoes & More Spray & Play!

For active pest problems, apply twice in **7-10 days** to break the egg cycle and establish control. For ongoing prevention, apply every **30-45 days**, or as needed. Year-round use enhances results.

For Lawns & Larger Areas:

Dial Hose-End Sprayer (recommended): Set sprayer lid to 1 TBS and fill spray container with concentrate only. To treat 4,000 sq ft, add 8 oz of concentrate. To treat 1,000 sq ft, add 2 oz of concentrate. Attach hose end to sprayer lid. Attach lid to container.

Pre-Mix Hose-End Sprayer: Add concentrate to sprayer container. To cover 4,000 sq ft, add 8 oz of concentrate and warm water to 20 gallon fill line. For 1,000 sq ft, add 2 oz of concentrate and warm water to 5 gallon fill line. Attach hose end to sprayer lid. Attach lid to container. Shake until mixture is white.

HOW TO APPLY | With your sprayer attached to your hose and water faucet on, begin applying by facing your home and spray the bottom 2 ft. Continue into the yard, spraying any trees as high as possible, and work your way backwards to the property line. Walk at a steady pace and use a sweeping motion, slightly overlapping treated areas. Complete coverage is important, especially in shaded areas. Reapplication after heavy rain may be necessary. For ants, soak mounds and repeat as needed to establish control below ground.

For Home Perimeter Treatments & Smaller Areas:

Compression Sprayer: Mix 4 oz of concentrate per gallon of water to cover up to 1,000 sq ft. For perimeter, apply to bottom 2 ft of structure and 3 ft of ground around foundation to keep pests away.

For Mosquito Control:

Fogger: Mix 4 oz of concentrate per gallon of water. Thoroughly fog potted plants, shrubs, landscape & lawn surrounding the area you wish to occupy. Allow fog to penetrate foliage. Safe to enjoy immediately.

Misting Systems: Mix 16 - 25 oz of concentrate to 50 gal of water. Use higher rate to enhance results.

For Laundry: For pet bedding, clothing & linens, use 2 oz per load with laundry soap.

CAUTION | Avoid contact with eyes. In case of eye contact, flush with water for at least 15 minutes. Do not take internally. After use, wash hands with soap & water. Keep out of reach of children. May cause phytotoxic burn to plant life if applied in temperatures over 90 °F / 32 °C or in full sun with high temperatures. Apply at your own risk. Wear eye protection and gloves when handling.

OUR STORY

When you love someone, you do everything in your power to protect them. I thought I was keeping Luna safe by using flea & tick control prescribed by a vet, but when she experienced devastating side effects ranging from skin issues to organ failure, I knew there had to be a better way.

I founded Wondercide to protect pets, people and property without harsh chemicals. Today, our full line of natural products protects families around the world.

Stephanie & Luna
