This product is a ready-to-use insecticide which provides effective control against crawling and flying insects, pests and mites. Surfaces treated with CELITE® 610 will control flying insects if they land on the treated surface. CELITE® 610 is a mechanical insect killer. Insects cannot become immune to its action. Insects come in contact or ingest this powder and die within 48 hours.

APPLICATION

This product is for use in and around residential, commercial and agricultural buildings. Surfaces and their immediate surroundings, in and around food/feed handling establishments, in and around livestock and poultry houses and may be applied over the top while animals are present, on crops, and stored grain.

CAUTION: CELITE® 610 is intended for consumer-grade commercial use only. It is intended to be applied in targeted areas. It is not intended for the treatment of entire fields or large areas of land.

SLURRY MIXING:

When a WP application is desired or being utilized, use the following procedure:

1. Fill spray tank using 2/3 of the desired amount of water and add optional non-ionic surfactant according to label instructions.
2. Typical ratio is 36 oz of CELITE® 610 in 1 gallon of water in the total spray mixture. Maximum slurry solids is 1.85 lbs per gallon of water.
3. After CELITE® 610 is thoroughly blended add the remaining amount of water and stir.

NOTES:

- Non-ionic surfactants or wetting agents are used to promote adhesion on hydrophobic surfaces.
- It is advised to mix this solution directly prior to spraying and apply the entire batch within 8 hours.
- CELITE® 610 will settle if left undisturbed for more than 1 hour, therefore, it is recommended to shake the container prior to restating the application.
- When proper coverage is obtained, a visible white residue will be apparent on the treated surface.

CROP APPLICATIONS

CELITE® 610 may be applied as a wettable powder to all growing crops to control insect pests. Maximum application rate of 3 lbs per acre with a maximum application rate of 70 lbs per acre. Slurry solids should be adjusted to match the application equipment. Repeat treatments to maintain adequate control in the event of rain. It is advisable to add non-ionic surfactants or wetting agents to promote adhesion on foliage.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 190. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the use of the pesticide on this label about personal protective equipment (PPE) and restricted-entry requirement. The entries in this box only apply to uses of this product that are covered by the Worker Protection Standard. This product does not have a restricted entry interval (REI) after application.

POULTRY AND LIVESTOCK

For use in and around Poultry and Livestock housing structures, swine houses, cattle barns, calf hutches, feeding lots, stables and kennels to control insect pests and mites. Apply uniformly to infested areas of walls and floors, cracks, crevices, bedding, wall voids and around window and door frames. Applications are permitted when animals are present and may be used over the top of animals. Applications are considered mid-flight while birds are present. Treat all the birds. Do not apply directly to animal feed or watering equipment. Litter should be retreated when replaced and before each new batch of poultry is introduced to the facility. Repeat treatments as necessary to maintain adequate control if chickens, turkeys or other animals are covered with animal excreta.

Litter Treatment: Use a handheld, power duster or powder spreader to evenly distribute 4 lbs per 1000 square feet over the litter, to the areas underneath feed and watering equipment lines. Applications can be made up to 7.5 lbs per 100 square feet for severe infestations. Litter exceeding 3 inches deep, apply up to an additional 2.5 lbs per 100 square feet per additional inch of litter.

Wall Treatment: Apply as a dry powder OR wettable powder to cracks and crevices. The amount of product to be applied will vary with the site but should be in the range of 2-5 oz/100 square feet.

STORING GRAIN

An effective addition for insect pest control, by physical action for suppressing insect damage to stored grain, including barley, buckwheat, corn, oats, rice, rye, sorghum grain, wheat, and mixtures of these grains. Adjust moisture content of grain to not over 12% by weight and add 1-2 lbs of this product per ton of grain at the point of entry into storage. Up to 7 pounds of this product per ton of grain can be added in the event of severe infestation. Treated grain may be reduced to a lower grade, have reduced flowability and test weight. For best results, treat grain immediately after harvest.

FOOD AREAS OF FOOD/FEED HANDLING ESTABLISHMENTS

Food/feed handling establishments are places other than private residences in which food/ feed is held, processed, prepared or served. Apply CELITE® 610 where these insect pests may be entering the structure, travelling, breeding or harboring. Remove or cover all food or feed items in the treatment area or applying product. If applying product in storage areas below floors, above ceilings, within walls, underneat, underneath and behind equipment or appliances, around pipes and sinks, in utility closets and around garbage and waste cans. In food handling areas, areas where food or feed products are prepared or stored, apply as a 1% slurry on floors, walls & crevice or spot treatment. As a crack & crevice treatment, apply sparingly into cracks and crevices using equipment designed to place powder into specific locations. Limit spot treatments to walls or floors where pests are suspected of hiding. No individual spot treatments exceed 2 oz/100 sq ft of area. Repeat treatment on dry surfaces if CELITE® 610 has been removed to maintain control of problem insect pests. Apply as a dry powder OR wettable powder in a targeted manner. The amount of product to be applied will vary with the site but should usually be in the range of 2.5 oz/100 square feet.

RESIDENTIAL USES (INDOOR AND OUTDOOR APPLICATIONS)

In living areas, make applications in such a manner as to avoid deposits on exposed surfaces or introducing the material into the air. Application as WP will facilitate a targeted application. Treat a small area of the surface to be treated and look for staining or other adverse reactions before making regular application.

To apply CELITE® 610 directly into cracks and crevices, use a bulbous duster or other suitable equipment. Apply lightly and uniformly to infested areas. The amount of product to be applied will vary with the site but should usually be in the range of 2-5 oz/100 square feet.

Indoor Use: Lightly coat a thin layer of CELITE® 610 in areas where target pests are found and may hide such as cracks and crevices, beneath and beneath refrigerators, cabinets, stoves, garbage cans and in and around sewer pipes and drains, window frames and in attics and basements. Dust insects directly if possible. Repeat treatment if the product is inadverently removed. The amount of product to be applied will vary with the site but should usually be in the range of 2.5-5 oz/100 square feet.

Outdoor Use: Thoroughly treat the food/feed and bedding in and around pets’ sleeping quarters. Treat surrounding cracks and crevices. Lightly coat carpeting and wherever fleas are suspected.

Carpet Beetles: Dust along baseboards, carpet edges, under carpeting, furniture, in closets and other areas where these insects are seen or suspected.

Bedbugs: Dismantle bed. Use CELITE® 610 in joints, crevices and where wuns are inserted. See that all interior areas are dusted. Mattresses especially folds and edges. All cracks and crevices and around window openings in the bedroom should be treated.

Outdoor Use: Lightly coat a thin layer of CELITE® 610 in areas where these insect pests are found such as patios, outdoor window and door frames. Apply around foundations, along ant trails and around sewer pipes and drains. Repeat treatment if the product is inadvertently removed. The amount of product to be applied will vary with the site but should usually be in the range of 2.5-5 oz/100 square feet.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry area.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of onto the land in accordance with disposal procedures.

CONTAINER DISPOSAL: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partially filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

Manufacturer makes no warranty, expressed or implied, regarding the performance of this product in the absence of control how it is used.

Net Weight: 40 lbs (18.1 kg)
