**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION:** Harmful if swallowed. Harmful if absorbed through skin. Harmful if inhaled. Avoid contact with skin, eyes, or clothing. Avoid inhaling spray mist. Prolonged or frequent repeated skin contact may cause allergic reactions in some individuals. Wear long-sleeved shirt and long pants, socks, shoes, and gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

**FIRST AID**

- **IF SWALLOWED**
  - Call a poison control center or doctor immediately for treatment advice.
  - Have person sip a glass of water if able to swallow.
  - Do not induce vomiting unless told to by a poison control center or doctor.
  - Do not give anything by mouth to an unconscious person.

- **IF ON SKIN**
  - Take off contaminated clothing.
  - Rinse skin immediately with plenty of water for 15-20 minutes.
  - Call a poison control center or doctor for further treatment advice.

- **IF INHALED**
  - Move the person to fresh air.
  - If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
  - Call a poison control center or doctor for further treatment advice.

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

See Back Panels For Additional Precautionary Statements

**ACTIVE INGREDIENTS:**

- Dinotefuran (CAS # 165252-70-0) 0.50%
- (Z)-9-Tricosene (CAS # 27519-02-4) 0.04%

**OTHER INGREDIENTS:**

- 99.46%
- TOTAL 100.00%

**USER SAFETY RECOMMENDATIONS:**

- Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

**ENVIRONMENTAL HAZARDS:** This product is toxic to shrimp. Do not apply directly to water, areas where surface water is present, or to intertidal areas below the mean high water mark. Drift or runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters. This product is highly toxic to bees exposed to direct treatment. Do not apply this product if bees are foraging in the treatment areas.

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL, USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

**USE RESTRICTIONS**

- Do not use inside homes or residences, or any place where children or pets might be present.
- Do not apply this product in a way that will contact workers or other persons.
- Do not allow contact with food or water.
- Do not apply where food production animals can consume.
- Do not use in or on edible product areas of food processing plants or other areas where food is commercially prepared or processed.
- Do not use in serving areas while food is exposed.
- Do not use in food/feed areas of food/feed handling establishments.
- Do not apply to classrooms or hospital rooms.
- Do not apply to windy areas as house flies avoid these areas.

This product is generally non-staining but may leave a residue due to the bait constituents. Where aesthetics are of concern, apply a small amount of product in an inconspicuous location and observe area following drying to determine potential effects on treated surfaces.

**NOTES**

Measurements are in inches.
**PRODUCT INFORMATION**

**MUSCA-CIDE**™ FLY BAIT SPRAY is an effective fly bait formula that contains (2)-8-hydroxy-6-methyl2-nonenonic fly attractant.

**Mix in water for the desired application technique and mix thoroughly until the powder has dissolved and a solution is created.** Apply to locations where flies gather or concentrate, such as walls, beams, around windows, doors and other entry points, support structures, walkways, garbage chutes/bins, refuse containers, and other locations where you see a problem.

For best results, apply in several spots from 2 to 15 ft² or make band applications to locations of fly activity.

**Dilute in water and either paint on or spray onto surfaces where flies will feed on the bait and die.** Applications in these areas may be no more than 2 sq. ft, per treated area, and may not be spaced closer than 10 ft apart. Avoid contamination of food or food contact surfaces. Do not apply this product to any food, food packaging, or any food contact surfaces.

**APPLICATION LOCATIONS:**

- Use at canneries, beverage processing plants, meat and poultry processing facilities, food processing plants, refuse containers, garbage cans, zoos, commercial food/feed handling, restaurants, laundries, hospitals, hospitals, bakeries, supermarkets, offices, marinas, nursing homes, outside of residences, loading docks, warehouses, commercial real estate and other areas where flies are a problem.
- Applications in food/feed handling establishments are allowed ONLY in non-food/non-feed areas. Non-food/non-feed areas include garbage rooms, laundries, entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, mop closets and packaged food/feed storage. Food/feed handling establishments are defined as places other than private residences in which exposed food/feed is held, processed, prepared or served. Included are areas for receiving, storing, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed purchasing systems (e.g., dairies, industrial packing plants, bakeries, and convenience stores). Service areas, when food is exposed and the facility is in operation, are also considered food/feed areas. However, applications of this product may be made in serving areas ONLY while the facility is in operation, and provided exposed food and food contact surfaces have been covered, or removed from the area being treated prior to application. Applications in these areas may be no more than 2 sq. ft, per treated area, and may not be spaced closer than 10 ft apart. Avoid contamination of food or food contact surfaces. Do not apply this product to any food, food packaging, or any food contact surfaces.

**MUSCA-CIDE**™ FLY BAIT SPRAY is an important tool in an Integrated Pest Management Program (IPM) for the overall management of house fly populations in both rural and urban environments. An integrated approach to fly control includes: sanitation, manure management, physical barriers, sprays, mechanical traps and periodic rotation of baits with different modes of action. For best results, apply in several locations within a facility concentrating on areas where house flies are known and where garbage and other food collect. Start applications at the beginning of the season to help keep house fly populations manageable.

**Depending on the mode of application, the product once diluted, can be applied using a paint brush, roller, trigger sprayer, or low pressure compressed air sprayer. When using trigger sprayers or compressed air sprayers, vigorously agitate the solution to ensure the product is adequately dissolved in water. Applications of this product may have a horrid residue, so use caution when applying product to surfaces with aesthetic value. Make a test application in an inconspicuous location prior to making a full treatment for these areas.

**DIRECTIONS FOR USE:**

- Use in water for the desired application technique and mix thoroughly until the powder has dissolved and a solution is created. Apply to locations where flies gather or concentrate, such as walls, beams, around windows, doors and other entry points, support structures, walkways, garbage chutes/bins, refuse containers, and other locations where you see a problem.

Apply product in several spots from 2 to 15 ft² or make band applications to locations of fly activity. For best results, apply in bands of 6 – 8 inches in width when using paint on applications. Do not exceed 8 ounces of dry product per 1000 ft². Many smaller applications are more effective than a few large applications. Repeat applications as needed.

**AMOUNT OF DRY PRODUCT** 2 / 10 / 17 CCL Label Memphis

**FILE NO.:** T01155
