HOW TO ASSEMBLE: Grasp red connector-end and pull coiled tube out of sprayer head until fully extended. Without removing cap from bottle, remove sticker from top of closure, open flip cap. Push red connector-end of tube into opening in cap until it “snaps”. **HOW TO SPRAY:** Adjust nozzle to spray or stream position as indicated on nozzle. To prime sprayer, direct nozzle toward surface to be treated and squeeze trigger several times to draw liquid up through the length of the tube (Note: Keeping sprayer head below the level of the liquid in the bottle will make priming easier.) **AFTER USE:** Turn nozzle to OFF(X) position. *Apply the spray in full sun for maximum effect.* Repeat application as often as needed.
