

attention, have this label with you.

- Do not apply on plants. Plants contacted with the spray should be hosed off to prevent possible leaf burn.
- Keep out of lakes, streams and ponds.
- To prevent electrical shock, do not apply the product into electrical outlets or electrical boxes, or on any bare wires.
- We have tested the product on a variety of surfaces without problems, but it is possible that the plant oils could damage some vinyl siding or plastic surfaces, so test spray a small area first. Hose off area to remove any residue.

Physical Hazards: Contents under pressure. Keep away from heat, sparks and open flame. Exposure to temperatures above 130° F may cause container to burst.

Storage & Disposal: Store in a cool, dry area away from heat or open flame. When container is empty, recycle if available. Do not puncture or incinerate.

Limitations of Liability: Maggie's Farm Ltd makes no warranties of merchantability or fitness for any purpose except expressed on this label. Buyer assumes all responsibility for safety and use not in accordance with label directions and precautions.

Maggie's Farm Ltd represents that this product is a minimum-risk pesticide and is exempt from registration under EPA FIFRA 25(b). This product is not EPA registered.

Maggie's Farm Wasp & Hornet Killer kills stinging insects fast. Using natural plant oils as the active ingredients in a water-based formula, it leaves no harmful or oily residues. Bugs are tough, but solutions should be simple and effective. Maggie's Farm is committed to offering products that are Simply Effective. It's as simple as that!

DIRECTIONS FOR USE

Always read label directions and precautions prior to use.

Shake well before using and periodically during use.

This product can be used outdoors, and in unfinished indoor areas such as attics, basements, garages and sheds.

Wasp and Hornet Treatment: The best time to apply is at dusk, just before dawn or at night when these insects are less active and in the nest. Paper wasp nests can be sprayed during the day. Stand a safe distance from the nest. Spray with the wind at your back. Hold can in an upright position and aim spray nozzle at the nest or nest entrance. Press button firmly to spray and coat the nest opening for at least 10 seconds. Contact as many wasps / hornets as possible. Repeat as necessary.

Yellow Jacket Treatment: The best time to apply is at dusk, just before dawn or at night when these insects are less active and in the nest. Stand a safe distance from the nest. Spray with the wind at your back. Hold can in an upright position and aim spray nozzle toward the nest opening. Apply directly into the opening for at least 8 seconds to kill the yellow jackets in the nest. This will also repel any yellow jackets returning to the nest. Next, contact as many yellow jackets as possible outside the nest. Be aware that yellow jackets nests may have multiple entrances. Repeat as necessary.

Spider Treatment: Hold can in an upright position and aim spray nozzle at the web. Press button firmly to spray and contact as many spiders as possible. Repeat as necessary.

Precautions

- We recommend good safety practices when using any insecticide, such as avoiding contact with eyes and mouth, and avoiding directly breathing spray mist. If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If irritation persists, or if more than an incidental amount is swallowed, seek medical attention. If seeking medical
