See the back label for additional precautionary statements and instructions for use.

DIRECTIONS FOR USE

Read entire label and use accordingly. Shake well before use.

- Best used as a preventative.
- Use at first sign of disease.
- For maximum control spray all surfaces of living green leaves as Procidic is absorbed into the plant.
- Use up to day of harvest.

Application Directions

To prevent disease, begin spraying two weeks before disease normally appears. Spray every 7-10 days as long as needed.

Use on: apples, basil, beans, broccoli, cabbage, camations, cauliflower, celery, cherries, cucumbers, cucurbits, flowers, grapes (table and wine), kalanchoe, ornamentals, lettuce, melons, peaches, peppers, pineapple, potatoes, pumpkins, roses, sweet corn, strawberries, tomatoes and watermelon.

PRECAUTIONARY STATEMENTS KEEP OUT OF REACH OF CHILDREN

CAUTION Avoid contact with eyes, skin or clothing. Do not swallow. Wash thoroughly with soap and water after handling. Do not apply directly to water.

FIRST AID

If In Eyes: Flush eyes with plenty of water.

If Swallowed: Rinse mouth out with clean water. Do not induce vomiting.

- Apply in morning or late afternoon hours.
- For outdoor plants re-apply after rain.
- No re-entry period is required. When first sign of disease is discovered spray every 5 days for the first 2 weeks. Then spray every 7-10 days as long as needed.

Controls: anthracnose, bacterial canker, bacterial complexes, bacterial speck, bacterial spot, bacterial wilt, bunch rot, damping off, downy mildew, fusarium, goss's bacterial wilt, gray mold, leaf spot, late blight, monilinia blight, powdery mildew, root tumor, scab, soft rot and white mold.

STORAGE AND DISPOSAL

Storage: Store in cool, dry location.

Disposal: Do not reuse this container. Place in trash or offer for recycling if available.
