 PRECAUCION AL USUARIO: Si usted no lee ingles, no use este producto hasta que la etiqueta haya sido explicada ampliamente.  
 (TO THE USER: If you cannot read English, do not use this product until the label has been fully explained to you.)

**EPA REG. NO. 56-67**  
**EPA EST. NO. 35132-OH-1**

**Net Wt. 4 lbs. (1.81 kgs)**

**Item #203-4BG**

**FIRST AID**

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after 5 minutes, then continue rinsing. Call a Poison Control Center or doctor for treatment advice.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a Poison Control Center or doctor for further treatment advice.

**HAVE THIS PRODUCT CONTAINER OR LABEL WITH YOU WHEN CALLING A POISON CONTROL CENTER, OR DOCTOR, OR WHEN GOING FOR TREATMENT. You may also call 1-800-222-1222 for emergency medical treatment advice.**

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**  
**CAUTION:** Causes moderate eye irritation. Avoid contact with eyes. Use adequate ventilation and avoid breathing dust. For commercial and/or prolonged application wear a suitable dust mask approved by NIOSH/OSHA: (example; #TC-21c-132).

**PHYSICAL AND CHEMICAL HAZARDS**  
 Keep container tightly closed. Product must remain completely dry to retain insecticidal values.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **APPLY ONLY TO DRY SURFACES.** May be used by Pest Control Operators. Excess product may be removed by mop, sponge or dampened cloth. JT EATON™ KILLS BEDBUGS AND CRAWLING INSECTS POWDER™ kills insects by absorbing the fluids right out of their body! Insects dry-up . . . and die!

**GENERAL DIRECTIONS:** JT EATON™ KILLS BEDBUGS AND CRAWLING INSECTS POWDER™ contains Silicon Dioxide material composed of millions of minute, fossilized single-celled aquatic plants known as diatoms which were deposited in the earth's crust millions of years ago.

JT EATON™ KILLS BEDBUGS and CRAWLING INSECTS POWDER™ kills insects by abrasively removing and breaking down the oily protective membrane which covers the insect's body, legs, and other moving parts. Death results from dehydration (drying out), because it absorbs up to 50% of the insects fluids! An insect's body is approximately 65% water and when as little as 30% dehydration occurs the insect will die. Without water to replace such losses, domestic species of cockroaches and ants die within 1 to 2 days.

With JT EATON™ KILLS BEDBUGS and CRAWLING INSECTS POWDER™ there is an initial kill followed by the gradual, steady kill of the remaining insects. It remains effective until depleted and will continue to kill insects as long as the product stays dry!

**HOME and RESIDENTIAL PEST CONTROL**

Carefully transfer product into a bulb duster or puffer bottle. To apply, squeeze/puff the product through applicator tip, or apply product from container with a paint brush.

**INSECTS KILLED** by JT EATON™ KILLS BEDBUGS and CRAWLING INSECTS POWDER™, when used as directed, includes the following insects: **Ants, Bedbugs, Boxelder bugs, Cockroaches (German, American and Brown Banded), Crickets, Garden Slugs** entering dry indoor porch or patio areas, **Houseflies** coming to rest on treated surfaces, **Fleas, Millipedes, Silverfish, Sowbugs, Ticks.** **Make sure to only apply to dry surfaces.**

**SPECIFIC AREAS TO APPLY**

Apply behind stoves, refrigerators, under sinks, along baseboards, under the edges of rugs, in cracks and crevices, in window/storm window sills and frame openings, on mattresses for Bedbugs, on and beneath dry porches and indoor patios where insects are seen. Product is not effective in damp areas. For good house keeping practices treat those areas with an approved liquid household insecticide. For control of crawling insects (including cockroaches) indoors apply lightly to any dry area where crawling insects are seen, breed or have become a nuisance. For control, insects must crawl into and come in contact with the dry powder.

**FOR ANTS:** Apply along baseboards, entry cracks and crevices and to areas of intensive ant activity such as doors, windows, screens, porches, basements, attics, ant nests (mounds) and ant trails.

**FOR FLEAS:** For control treat pet quarters, bedding, and indoor kennel areas, and pet resting areas under porches. Sleeping mattresses in the home may also be treated. Replace any product that becomes wet. Apply monthly or as needed. Do not introduce, or puff, the product into the air.

**FOR BEDBUGS:** Squeeze container (puffer bottle or bulb applicator) to apply light puffs of the dust or use a paint brush to apply a light coating of dust to mattress surfaces, tufts and seams. Dismantle and treat bed parts, joints and interior areas. All cracks and crevices in the bedroom should be treated.

**BUSINESS and COMMERCIAL PEST CONTROL**

Commercial Transportation Facilities, Food Processing Plant Premise/Equipment, Eating Establishments Food Handling Areas (food contact), Eating Establishment Food Serving Areas (food contact), Food/Grocery Marketing/Storage/Distribution Facility Premise.

Carefully transfer product into any suitable dusting applicator or squeeze duster designed for application of an insecticide dust. As a crack and crevice treatment apply sparingly into cracks and crevices using equipment designed to place powder into specific locations. Limit spot treatments to wall or floor surfaces where pests have been seen or where pests are suspected of hiding. No individual spot treatment should exceed 2 sq. ft. All food or feed must be removed or covered before treatment. Treat open spaces below floors, above ceilings, within walls, under stairs, underneath and behind equipment or appliances, around pipes, under sinks, in utility closets and around garbage and waste cans.

**FOR FOOD AREAS**

Apply to control the insect pests as listed below as a "Crack and Crevice" or a "Spot" treatment in areas where food or feed is - Received, Processed (including enclosed processing systems), Packaged (Bottled, Boxed, Canned, Wrapped), Transported, Stored (including waste), Prepared, or Served.

**FOR NON-FOOD AREAS**

Apply (as directed above) as a "Crack and Crevice" or a "Spot" treatment for control of Ants, Boxelder Bugs, Crickets, Roaches and Silverfish to areas where pests hide, run or land, such as attics and spaces above suspended ceilings, basements, and crawl spaces, cracks in baseboards, moldings, and door frames, corners, in closets, cabinets, and shelves, window sills and frames, under and behind furniture and appliances, etc. Work into and apply under rugs, door mats, couches, etc.

**STORAGE AND DISPOSAL**

**STORAGE:** Store this product in its original container in a dry, cool, secured area. Do not contaminate water, foodstuffs, feed, or seed by storage or disposal.

**PESTICIDE DISPOSAL:** As a responsible environmental practice, where possible, it is recommended that all of the contents of the container be used, carefully following label directions and precautions.

**PESTICIDE CONTAINER DISPOSAL: IF PARTLY FILLED:** Call your local waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

**IF EMPTY:** Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

**SPILL:** In case of spill, if product is dry sweep up and use as directed, or dispose of material according to "IF PARTLY FILLED" directions above.

**NOTICE:** To the extent consistent with applicable law, buyer and user assume all risk and liability of use, storage and/or handling of this product not in accordance with the terms of this label.
