HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact the National Pesticide Information Center at 1-800-858-7378 for emergency medical treatment information.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Contains petroleum distillate. Vomiting may cause aspiration pneumonia.

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

Warning: Causes substantial but temporary eye injury. Causes skin irritation. Harmful if absorbed through skin or swallowed. **DO NOT** get in eyes, on skin, or on clothing. Wear long-sleeved shirt, long pants, chemical-resistant gloves made of any waterproof material, protective eyewear, shoes, and socks. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

Re-entry Statement: DO NOT allow people or pets to come into contact with treated areas until spray has dried.

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic organisms. To protect the environment, **DO NOT** allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface

waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

ENDANGERED SPECIES CONCERNS

The use of any pesticide in a manner that may kill or otherwise harm an endangered or threatened species or adversely modify their habitat is a violation of Federal law.

PHYSICAL AND CHEMICAL HAZARDS

COMBUSTIBLE. DO NOT use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with this labeling.

READ ENTIRE LABEL BEFORE USING THIS PRODUCT.

GRASS GETTER is a selective systemic grass killer to eliminate existing weedy grasses growing in and around plant beds, landscapes, and individual shrubs and trees (See **Tolerant Plants**). GRASS GETTER can be used through a hose-end sprayer according to the directions of the sprayers used or through a tank-type sprayer.

GRASS GETTER can also be used around listed fruit and vegetable areas (see **Table 2**) wherever listed weedy grasses occur. Use only tank type sprayers.

WEEDY GRASSES CONTROLLED: GRASS GETTER kills most annual and hard-to-kill perennial grasses up to 1-foot high, including the following examples, in one or two applications. Younger, actively growing seedling weeds are more easily killed than older, mature, well-established grassy weeds that may require a repeat application for control. Adding oil concentrate may help control grassy weeds.

Barnyardgrass
Bermudagrass
Broadleaf Signalgrass
Crabgrass, (Large, Smooth)
Fall Panicum
Foxtails (Giant, Green, Yellow)
Goosegrass
Johnsongrass (Seedling, Rhizome)
Junglerice
Lovegrass
Orchardgrass, Seedling
Quackgrass
Shattercane/Wildcane
Tall Fescue, Seedling
Texas Panicum
Wild Proso Millet
Wirestem Muhly
Witchgrass
Woolly cupgrass

Note: This product does not control sedge (including nutsedge or nutgrass), annual bluegrass, or broadleaf weeds. Red

fescue, chewings fescue, hard fescue, and dichondra turfs are also tolerant to GRASS GETTER.

APPLICATION TIMING: Apply when grassy weeds are actively growing, not exceeding the minimum of days from application to harvest when used on vegetables and fruits. Warm sunny weather will accelerate systemic movement from leaves and stems down to the roots to give complete kill. **DO NOT** mow or cut off tops of weeds before spraying. **DO NOT** apply if rainfall is expected within one hour following application. Growth of treated grass stops soon after application. Grass turns yellow and dies within one to three weeks depending on the grass species, stage of growth and weather conditions. Cool weather, drought and heat stress slow activity.

TABLE 1. GRASS GETTER (CONCENTRATE) AND OIL CONCENTRATE DILUTION

Water (gals)	Grass Getter®		Oil Concentrate*		Coverage (sq ft)
	(fl oz)	(tbsps.)	(fl oz)	(tbsps.)	
1	1	2	1	2	1,800
3	3	6	3	6	5,400
5	5	10	5	10	9,000
8	8	16	8	16	14,400

One gallon of spray will treat 1,800 square feet.

*To prevent leaf burn of desirable plants, **DO NOT use oil concentrate when** comfort index (temperature °F + humidity) exceeds 150.

HOSE-END SPRAYER APPLICATION

Water Dilution/Premixing Not Needed

Determine the area to treat in square feet. Pour 1 fluid ounce GRASS GETTER and 1 fluid ounce oil concentrate in the hose-end sprayer bottle for each 1800 square feet treated. Apply 1 fluid ounce per gallon. After application, wash the sprayer with a dilute soap solution and rinse according to the sprayer instructions.

Water Dilution/Premixing Needed

Some hose-end applicators recommend premixing liquid products with water before pouring into the sprayer bottle. Read the hose-end sprayer instructions for treatments at 1 fluid ounce per 1800 square feet. Clean the sprayer after use according to the sprayer instructions.

TANK SPRAYER APPLICATION

Mix 1 fluid ounce GRASS GETTER plus 1 fluid ounce oil concentrate per 1 gallon

water; spray to just wet the unwanted weedy grasses. One gallon of spray will treat 1800 square feet. Wash sprayer by flushing soapy water through the sprayer; then flushing clean water through the sprayer.

IMPORTANT: For spot treating grassy weeds near lawns and around sensitive plants, a tank-type sprayer is recommended. Spray carefully to avoid spray or drift contact with desirable plants. If drift occurs, wash foliage immediately with water.

FLOWERS, BEDDING PLANTS, EVERGREENS, SHRUBS, TREES AND ORNAMENTAL GROUNDCOVERS: GRASS GETTER may be applied over the top of desirable plants infested by weedy grasses, or as a directed spray to weedy grasses at labeled rates. **DO NOT** exceed dosage rate per gallon of spray. Most ornamental species tested have been found tolerant

to GRASS GETTER (see **Tolerant Plants** list). However, use with caution around the following plants as they may be damaged if spray contacts foliage: Azaleas (var. snow), Japanese Privet, Potentilla, Snow in Summer, Red Oak, White Oak, and ornamental grass.

GRASS GETTER may also be used on the following non-bearing food plants. **DO NOT** apply within 1 year of harvest.

Avocados
Dates
Figs
Olives
Plums
Pomegranates
Prunes

FRUITS AND VEGETABLES (Use Only with Tank Type Sprayers):
Use GRASS GETTER on the fruits and vegetables listed in **Table 2. Fruits and Vegetables**. **DO NOT** apply on or around any fruits and vegetables not listed on this label, especially sweet corn. Apply on

and around tolerant fruits and vegetables with a tank-type sprayer only. A second application may be made to all listed fruits and vegetables except peanut, root vegetables, and strawberry.

The quantities presented in **Table 1. GRASS GETTER (CONCENTRATE) AND OIL CONCENTRATE DILUTION** do not exceed the registered rates for the fruits and vegetables listed. **DO NOT** exceed the quantities presented.
