GENERAL INFORMATION

TRANSFIX® is an excellent sticking agent intended for use with most crop protection products in which the label permits the use of a spreader sticker. TRANSFIX® is compatible in spray solutions with most commercial crop protection and foliar feed micronutrients. A thin coating of TRANSFIX® solution bonds the pesticide to the crop foliage. This decreases the risk of residue erosion from rainfall or irrigation.

DIRECTIONS FOR USE

For Terrestrial Use Only – Not For Aquatic Use

Add TRANSFIX® to the spray tank as it is filling, with the agitator running. Performance is dependent upon environmental conditions. TRANSFIX® should be applied at least one hour before an expected rainfall. Sunlight during this time frame is also necessary for better adherence of the bond.
