deer & rabbit^{II} Deer Away[®]

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS:

For home & garden use only. **IMPORTANT:** This product contains egg solids, which may cause allergic reactions in some individuals. Not for direct use on plants intended for human consumption (i.e. food plants). Do not allow spray to drift onto plants intended for human consumption. Use this product to repel black-tailed deer (mule deer), white-tailed deer and Roosevelt elk that browse or uproot conifer seedlings. This product can be used to repel white-tailed deer from yew, Scotch pine, arborvitae, Douglas fir, flowering crabapple, hemlock, honeysuckle, azalea, rhododendron, landscape gardens and plantings, ornamental shrubs, garden vegetables, and fruit and citrus trees. Use this product to repel rabbits from ornamentals, landscape plantings and garden vegetables. Before applying, read specific application directions and use cautions below. Store at room temperature. Protect from heat and freezing. Freezing makes Havahart[®] Deer & Rabbit II - Deer Away[®] unusable. This product will stain structural surfaces. Do not apply to siding, roofing, decks, fences, driveways, painted surfaces or other structural material. Do not allow spray to drift onto structural surfaces in areas of application.

APPLICATION DIRECTIONS:

Before applying, read and understand all label instructions. **SHAKE WELL BEFORE USING!**

Weather Conditions: Do not apply at temperatures below 40°F, or in wet, windy conditions. Apply only in dry conditions and only under conditions favoring prompt drying of spray (lightly breezy, mild dry weather with low relative humidity). If spray is used in wet conditions or in damp, cold, foggy or misty weather, or if precipitation or freezing occurs before spray can dry, protection may be partially or completely lost.

PULL HERE TO OPEN/PRESS TO RESEAL ►

New Conifer Seedlings: New seedlings to be protected from winter browsing must be dormant and frost hardy before treatment. Assure complete coverage of new seedlings to the point of run-off. Once planted, retreat seedlings every 6 weeks during root establishment or as needed if previous treatment appears to be fading. **Note:** Browning and drop of old needles may occur on some evergreen species after using this product.

Established Conifer Seedlings: Treat each established seedling to be protected. Hold sprayer about 10" vertically above tip of terminal shoot. Spray the terminal and first whorl to run-off. Treat each seedling to be protected.

Yew, Scotch Pine, Arborvitae, Douglas Fir, Ornamental Crabapple, Hemlock, Honeysuckle, Azalea and Rhododendron*: **To protect against winter browsing:** apply repellent upon onset of browsing. If browsing extends beyond two months, seedlings may be re-treated. Apply only to vegetation that is within animals reach. Apply to the point of run-off.

To protect against spring browsing of new growth: apply repellent upon onset of browsing, but preferably after bud break and before new shoots exceed 1" in length. Do not re-treat new growth. If spring browsing reaches unacceptable proportions before bud break, repellent may be applied to unopened buds, but must then be re-applied after new growth averages 4" in length if browsing still persists. Apply to terminal to point of run-off. For large trees, apply Havahart® Deer & Rabbit II - Deer Away® only to lateral branches that are within animals reach. **Note:** Browning and drop of old needles may occur on some evergreen species after using this product.

Ornamental Shrubs*: Do not apply during bud break or flower bloom, as foliage injury and petal drop may occur. Apply only to areas of vegetation that are within animals reach. Apply to the point of run-off.

Non-Bearing Fruit and Citrus Trees*: For use on non-bearing fruit & citrus trees only. Use when trees are dormant, not when actively growing. Do not apply during bud break or flower bloom, as foliage injury and petal drop may occur. Apply only to vegetation that is within animals reach. Apply to the point of run-off.

Landscape Gardens*: Do not apply to landscape plantings during bud break or flower bloom, as foliage injury and petal drop may occur. Apply to areas of vegetation that are within animals reach. Apply to the point of run-off.

Vegetable Gardens*: This product is not for direct application to plants intended for human consumption (i.e. food plants). For use as a perimeter spray around the area where food plants are grown. To create a repellent barrier, apply this product to soil, ground cover, bark mulch, perimeter vegetation and non-food vegetation adjacent to food plants. Do not allow spray to drift from application site onto any part of the plant that is intended for human consumption.

*Reapply every 14 days or as needed if the previous treatment appears to be fading.

STORAGE AND DISPOSAL:

PESTICIDE STORAGE: Store only in a cool, dry area inaccessible to children and pets. Protect from freezing and heat. Keep container tightly closed to prevent evaporation. **PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill this container. **If Empty:** Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. **If Partly Filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse.
