

TERRO®

Carpenter Ant & Termite Killer***

termitas y
jas carpinteras***

Quick killing action
Non-staining
No unpleasant odor

Also Kills
Carpenter Bees,
Wood Wasps,
Beetles and Borers.

KEEP OUT OF REACH
OF CHILDREN

CAUTION

See Rear Panel for Additional
Precautionary Statements.

MANTÉNGASE FUERA DEL
ALCANCE DE LOS NIÑOS

PRECAUCIÓN

Vea el panel posterior para
Precauciones adicionales.

ACTIVE INGREDIENTS/INGREDIENTE ACTIVO:

Tetramethrin	0.20%
Permethrin*	0.50%
Piperonyl Butoxide**	1.00%
OTHER INGREDIENTS/OTROS INGREDIENTES:	98.30%
TOTAL	100.00%

*Cis/trans ratio: min. 35% (+/-) cis and max. 65% (+/-) trans.
**Equivalent to min. 0.8% (butylcarbitol)(6-propylpiperonyl) ether
and 0.2% related compounds.

***Kills worker or winged forms of termites.
See back panel for additional information.

NET WT/PESO NETO 1 lb. (453g)

Shake well before using

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION: This product provides effective control of pests in and on buildings and structures and their immediate surroundings and on modes of transport. Permitted areas of use include, but are not limited to: apartment buildings, homes, and trailers. In the home, cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Remove pets and cover fish aquaria before spraying. Prevent re-entry of dogs and cats into treated area until spray deposits are dry.

GENERAL PRECAUTIONS & RESTRICTIONS: Do not allow adults, children, or pets to enter the treated area until sprays have dried. Do not apply directly to sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur, except as directed by this label.

CARPENTER ANTS: For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Inject into wall voids and infested wood through existing openings or newly drilled small holes.

APPLICATION RESTRICTIONS FOR OUTDOOR USE: Do not water the treated area to the point of run-off. Do not make applications during rain. All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses: (1) Treatment to soil or vegetation around structures; (2) Applications to building foundations, up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and-crevice applications only. Not for use in outdoor residential misting systems.

LOCALIZED TREATMENT OF WOOD-INFESTING INSECTS:

Beetles and Borers, Carpenter Bees, Wood Wasps and Termites: Locate area of infestation and/or insect tunnels and cavities. Using the crack & crevice tip (already included); spray into tunnels, galleries and inaccessible closed voids. In infested areas, small holes should be drilled 8 to 10 inches apart to insure thorough insecticide gallery treatment. Be sure not to contact electrical wiring or plumbing when treating. For **Carpenter Bees**, seal the entrance holes with small pieces of stainless steel wool after application.

Termites, Carpenter Ants and Carpenter Bees: For termites, the purpose of such applications is to kill workers or winged forms which may be present in the treated areas at the time of application. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but are merely supplemental. Not recommended as sole protection against termites. For active infestations, get a professional inspection.

CRACK & CREVICE INJECTION: Hold container upright and tilt extension tube to a 90° angle with can and inject into cracks and crevices where insects may be hiding, living and breeding. Place injection tip 1/2 inch into cracks, crevices, holes and other small openings where insects may be a problem. Release a one-second spray per spot. In serious infestations, if possible, place spots approximately 12 inches apart. In light infestations or for preventative treatment, place spots approximately three feet apart. In long running cracks, move the injector tip along the crack while spraying. Move at the rate of one linear foot per second in heavy infestations and three feet per second in light infestation. See the additional directions above for effective control of specified insects.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID

IF ON SKIN OR CLOTHING:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 – 20 minutes.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

ENVIRONMENTAL HAZARDS: This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

PHYSICAL AND CHEMICAL HAZARDS: Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not use this product in or on electrical equipment due to the possibility of shock hazard. Do not use on surfaces that can be harmed or stained by water.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal. **STORAGE:** Do not store near heat or open flame. Store in cool dry area away from children. **PESTICIDE DISPOSAL AND CONTAINER HANDLING:** Do not puncture or incinerate! If empty: Offer for recycling if available or place in trash. If partly filled: Call your local solid waste agency for disposal instructions.

Agite bien antes de usar

AVISOS DE PRECAUCIÓN

RIESGOS PARA HUMANOS Y ANIMALES DOMÉSTICOS

PRECAUCIÓN: Evite el contacto con la piel o la ropa. Lave bien la piel con agua y jabón después de manipularlo. Retire la ropa contaminada y lávela antes de volverla a usar.

PRIMEROS AUXILIOS

SI ESTÁ EN LA PIEL O EN LA ROPA:

- Quite la ropa contaminada.
- Enjuague la piel inmediatamente con abundante agua por 15 a 20 minutos.
- Llame a un centro de control de envenenamientos o a un médico para obtener asesoramiento sobre el tratamiento.

Quando llame a un centro de control de envenenamientos o a un médico, o busque tratamiento, tenga a mano el envase o la etiqueta del producto.

RIESGOS AMBIENTALES: Este pesticida es extremadamente tóxico para los organismos acuáticos, incluidos los peces y los invertebrados. Para proteger el medio ambiente, no deje que el pesticida entre o escurra hacia desagües pluviales, zanjas de desagüe, alcantarillas ni aguas superficiales. Aplicar este producto en un clima tranquilo, cuando no haya pronóstico de lluvia durante las siguientes 24 horas, ayudará a asegurar que el viento o la lluvia no soplen o laven el pesticida del área de tratamiento. Este pesticida es altamente tóxico para las abejas expuestas al tratamiento directo o a residuos en los cultivos o hierbas en flor. No aplique este producto ni deje que llegue hasta los cultivos o hierbas en flor si hay abejas que visitan el área de tratamiento.

RIESGOS FÍSICOS Y QUÍMICOS: Contenido bajo presión. No utilice ni almacene el producto cerca de fuentes de calor o fuego. No perforo ni incinere el envase. La exposición a temperaturas superiores a 130°F (54°C) puede causar una explosión. No utilice este producto dentro de o sobre equipos eléctricos, debido al riesgo de descarga eléctrica. No utilice en superficies que se puedan dañar o manchar con el agua.

ALMACENAMIENTO Y ELIMINACIÓN

No contamine el agua, los alimentos o el forraje al almacenar o desechar. **ALMACENAMIENTO:** No almacene el producto cerca de fuentes de calor o fuego. Almacene en un área fresca y seca, lejos del alcance de los niños. **DESECHO DEL PESTICIDA Y MANIPULACIÓN DEL ENVASE:** No perforo ni incinere el envase! Si está vacío: Si está disponible, ofrézcalo para reciclaje o colóquelo en la basura. Si está parcialmente lleno: Llame a su agencia local de desechos sólidos para obtener instrucciones sobre cómo eliminar el producto.
