ENFORCER® RoachMax™ Bait Stations

For Use in and Around: Apartments and homes including but not limited to: bedrooms, kitchens, counters, corners, under and around cabinets, sinks and near plumbing fixtures.

Enforcer RoachMax Bait Stations are designed to kill both large and small roaches. The active ingredient, Abamectin, is an advanced formula that kills roaches 24 hours a day. Enforcer RoachMax Bait Stations kill roaches where they breed – behind your walls. These unique bait stations continuously kill roaches for up to three months. Enforcer RoachMax Bait Stations are designed to eliminate even severe roach infestations and will kill roaches that are resistant to other types of insecticides.

Enforcer RoachMax Bait Stations Kill: German Cockroaches, Oriental Cockroaches, American Cockroaches, Brown Banded Cockroaches and Smokey Brown Cockroaches.

FACT: Cockroaches are nocturnal – if you've seen one, you haven't seen them all. The fact you see by day were most likely forced out by overcrowding, a possible sign of severe infestation.

FACT: Allergies can be aggravated by dust created by cast-off cockroach skin, dead bodies and droppings.

FACT: Cockroaches feel safe in cracks and crevices. Cockroaches spend as much as 75% of their lives hiding in cracks and crevices.

Enforcer's unique "Clear View" design allows for easy visible inspection.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Remove bait stations from container.
2. For thorough roach control, use all 6 baits at one time.
3. Baits work best on horizontal surfaces touching corners and walls. For example, place baits next to the wall along baseboards, in corners, under sinks, in cabinets and near plumbing fixtures.
4. Roaches will begin eating the bait immediately. You will see fewer roaches within days.
5. Replace ALL baits every three months or until the roach population is completely eliminated.

For maximum effectiveness, replace baits before they are completely consumed.
