Enforcer®

Instant Knockdown

Wasp & Hornet Killer

NON-CONDUCTIVE UP TO 47,300 VOLTS

- Kills Wasps, Hornets and Yellow Jackets
- Kills The Entire Nest
- Jet Blast 22 Feet
- For Outdoor Use Only

ACTIVE INGREDIENTS:

Tetramethrin	0.10%
Permethrin*	0.25%
Piperonyl Butoxide**	0.50%
OTHER INGREDIENTS:	99.15%
Total	100.00%

Contains Petroleum Distillate

* Cis/trans ratio: min. 35% (+/-) cis and max. 65% (+/-) trans.

**Equivalent to min. 1.4% (butylcarbityl) (6-propylpiperonyl) ether.

KEEP OUT OF REACH OF CHILDREN

CAUTION See Back Panel For Additional Precautions.

NET WEIGHT: 1 lb (454 g)

Enforcer® Instant Knockdown Wasp & Hornet Killer

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read Entire Label.

Avoid use on shingles and vinyl siding. Damage may occur. Do not spray on trees, shrubs, ornamental plants or grass. If spray contacts these surfaces immediately rinse with water.

Do Not Shake Before Using. Hold Can Upright. Apply in Short Bursts.

To Kill Wasps: For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will kill wasps returning to the nest. Wait at least 24 hours before removing the nest.

To Kill Yellow Jackets: Yellow Jackets make their nests in the ground, dead tree stumps, railroad ties, walls or similar structures. During daylight hours, watch them closely to determine location of nest entrance. Wait until dusk or early morning when insects are at rest. Spray for about 1-2 seconds or until surfaces are moist.

To Kill Hornets: Unless you can clearly see the opening at the bottom of the hornets' nest, never use a hornet spray on the nest as hornets may escape and attack you. Hornets usually make their nests in trees, shrubs and under eaves. During daylight hours, determine location of nest entrance. Wait until dusk or early morning when insects are at rest. Direct the spray into entrance hole. As hornets fall out, continue spraying until no more are visible or the can is empty. Leave area immediately.

To prevent entrance of insects into the house, spray around points where insects enter such as outside plumbing, faucets, windows, doors, etc. and cracks and crevices in foundation.

Precautions and Restrictions: Entry Restrictions – Do not allow adults, children, or pets to enter the treated area until sprays have dried. **Application Restrictions** – Do not apply this product in a way that will contact adults, children, or pets, either directly or through drift. Remove pets, birds, and cover fish aquariums before spraying. Do not make application during rain. Do not water the treated area to the point of run-off. All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for applications to building foundations, up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and-crevice applications, only. Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. Do not use in commercial food/feed handling establishments, restaurants or other sites where food/feed is commercially prepared or processed. Not for use in Federally inspected meat and poultry plants. Not for indoor use.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal. **PESTICIDE STORAGE:** Do not store near heat or open flame. Store in cool dry area away from children. **CONTAINER DISPOSAL:** Do Not Puncture or Incinerate! IF EMPTY: Offer for recycling, if available. IF PARTLY FILLED: Call your local solid waste agency for disposal instructions.

PRECAUTIONARY STATEMENTS

Hazards To Humans & Domestic Animals

CAUTION. Causes moderate eye irritation. Avoid contact with eyes or clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove contaminated clothing and wash clothing before reuse. Harmful if swallowed, inhaled, or absorbed through skin. Avoid contact with skin. Avoid breathing sprays or vapors.

FIRST AID

IF IN EYES: Call a poison control center or doctor for treatment advice. Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. **IF SWALLOWED:** Immediately call a poison center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. In case of medical emergencies or health and safety inquiries, or in case of fire, leaking or damaged containers, information may be obtained by calling 1-888-740-8712.

NOTE TO PHYSICIAN: Contains petroleum distillate - vomiting may cause aspiration pneumonia.

Environmental Hazards

This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. Do not apply directly to or near water. Drift and run-off may be hazardous to fish in water adjacent to treated areas. Do not contaminate water when disposing of equipment, washwater, or rinsate. See Directions for Use for additional precautions and requirements. This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

Physical and Chemical Hazards

Flammable. Contents under pressure. Keep away from heat, sparks and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130˚F may cause bursting.
