SHAKE WELL BEFORE USING

STOP. READ ENTIRE LABEL BEFORE USE.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not allow people or pets to contact treated surfaces until dry.

Do not apply directly to residential lawns and turf in residential settings (e.g., homes, parks, schools, athletic fields or any other area frequented by the general public).
Do not apply to carpets and hard surfaces as a pin stream or coarse spray treatment.
All outdoor spray applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

1. Application to pervious surfaces such as soil and vegetation;
2. Perimeter band treatments of 7 ft wide or less from the base of a man-made structure to pervious surfaces (e.g., soil, mulch or groundcover that abuts the perimeter of the treated structure);
3. Applications to underside of eaves, soffits, doors or windows permanently protected from rainfall by a covering, overhang, awning or other structure;
4. Applications around potential exterior pest entry points into man-made structures, such as doorways and windows, when limited to a band not to exceed 1 inch;
5. Applications to vertical surfaces (such as the side of a man-made structure) directly above impervious surfaces (e.g., driveways, sidewalks, etc.), up to 2 ft above ground level;
6. Applications to vertical surfaces directly above pervious surfaces (such as soil, mulch or vegetation), only if the pervious surface does not drain into ditches, storm drains, gutters or surface waters

• Spot treatments must not exceed 2 sq ft in size (for example, 2 ft by 1 ft or 4 ft by 0.5 ft). • For soil or foliar applications, do not apply by ground within 25 ft of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries and commercial fish farm ponds. • Do not spray the product into fish pools, ponds, streams or lakes. Do not apply directly to sewers or storm drains, or to any area like a drain or gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. • Do not apply directly to impervious horizontal surfaces, such as sidewalks, driveways and patios, except as a spot or crack-and-crevice treatment. • Do not apply or irrigate to the point of runoff. • Do not make applications during rain. Avoid making applications when rainfall is expected before the product has sufficient time to dry (minimum 4 hours). Rainfall within 24 hours after application may cause unintended runoff of pesticide application. • Treat surfaces to ensure thorough coverage, but avoid runoff. • To treat insects harbored in voids and cracks-and-crevices, applications must be made in such a manner to limit dripping and avoid runoff onto untreated structural surfaces and plants. • Do not apply when the wind speed is greater than 15 mph.

HOW TO USE • *For spot treatment only.* All food preparation surfaces and utensils should be covered during treatment or thoroughly washed before use. Avoid contamination of food and drinking water. Remove pets and cover aquariums before spraying. • SHAKE WELL BEFORE USING. Push extension tube into nozzle located above the trigger and remove safety tab. Tilt extension tube to a 90 degree angle with can. Point away from face. Slowly pull trigger to dispense foam. Apply evenly. Avoid dripping and runoff. • Treat infested areas and areas likely to be infested, such as wood surfaces, voids and tunnels in damaged wood, behind veneers, in structural voids (between stud walls and spaces between wood and foundations), along cracks and along crawl spaces. Termites‡ coming into contact with the product will be killed.

TIPS TO REDUCE THE RISK OF TERMITES‡
In addition to using this product to spot treat for termites, there are some important steps you can take to reduce the risk of getting termites:

- Eliminate sources of moisture for termites (any areas that remain moist inside and outside the home)
- Remove food sources (any direct wood to ground contact, including branches for trees and shrubs)
- Apply a pre-treatment when building a new home
- Have a regular termite inspection

‡Spectracide Terminate® Termite Killing Foam$_2$ will kill workers and/or winged reproductive forms of termites present at the time of application only. For active structural infestations by subterranean termites, this product can be used only to supplement application of a federally registered stand-alone termiticide. Application of this product will not provide structural protection nor substitute for mechanical alteration or soil or foundation treatment with termiticide. This product is not to be used as sole protection against termites, as it will neither eliminate termite infestations nor provide protection against future infestations. A professional inspection is recommended.

FOR CARPENTER BEES • Treat active tunnels where carpenter bee activity has been observed. Leave the entrance hole open for 48 hours after application to allow the bees to contact and distribute the insecticide throughout the nest galleries. Then plug the entrance hole with a piece of wooden dowel coated with carpenter's glue or wood putty. Plugging the hole will prevent reinfestation of old nesting tunnels and reduce the chances of wood decay.

STORAGE AND DISPOSAL

Storage: Store in a cool, dry area away from heat or open flame. **Disposal:** Do Not Puncture or Incinerate! **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Do not pour or dispose down-the-drain or sewer. Call your local solid waste agency for disposal instructions.

Do not allow to enter indoor or outdoor drains. Follow proper disposal procedures on label.
No permita la entrada a desagües internos o externos. Siga la indicaciones del etiquetado para el desecho apropiado del producto.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

First Aid • **If Swallowed:** Immediately call a Poison Control Center or doctor. Do not induce vomiting unless told to do so by a Poison Control Center or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person. • **If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice.
Have the product container with you when calling a Poison Control Center or doctor, or going for treatment.

Note to Physician: Contains petroleum distillates - vomiting may cause aspiration pneumonia.

Physical or Chemical Hazards

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

NOTICE: To the extent consistent with applicable law, buyer assumes all responsibility for safety and use not in accordance with directions.
