Raid® **DEFENSE SYSTEM**

ATTACK BUGS › CONTROL BUGS › PREVENT BUGS

Helps you work smarter, not harder, to fight bugs.
Visit **raid.com** to identify your bug and best treatment plan.

Use This Product To:

ATTACK BUGS **KILL BUGS ON CONTACT**

Use this product outdoors to kill wasps and hornets and their entire nest on contact. For best results, spray in the morning or evening when insect activity is minimal. Spray directly into the nest opening until the entire nest is saturated.

KILLS · Wasps · Hornets · Yellow Jackets

Use Other Raid® Products To:

CONTROL BUGS **KILL BUGS AT THE SOURCE**

Use a Raid® Roach bait product to kill roaches where they hide. For heavy infestations, first use a Raid® Fogger or Fumigator product and then place baits to provide ongoing control. Read the label to find the right product for your bug problem.

PREVENT BUGS **KEEP BUGS OUT**

Use a Raid® Perimeter Protection product to help keep roaches and other listed bugs out of your home. Or, spray this product along baseboards, inside cracks, and behind appliances. Do not spray surfaces with more than one pest control product. Read the label to find the right product for your bug problem.

TIPS

- Do not leave doors and windows open.
- Inspect screens for holes and loose edges that may allow wasps and hornets to enter.
- Keep a tight fitting lid on garbage cans and receptacles to avoid attracting wasps.

ELECTRICALLY NON-CONDUCTING UP TO 32,500 VOLTS

TWIST AND SNAP OFF TAB BEFORE SPRAYING

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not use this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of area during application. Exit area immediately and remain outside the treated area until all sprays have dried.

FOR OUTDOOR USE ONLY: To kill paper wasps, yellow jackets, mud daubers, bald-face hornets, and bees: For best results, spray in early morning or early evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. Hold can as upright as possible while spraying. Point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Wait at least 24 hours before removing the nest. Remove all exposed food and cooking utensils. Cover all food handling surfaces or wash thoroughly after treatment and before use. Do not use on edible crops. Do not apply to pets or contaminate feed, foodstuffs, dishes or utensils. Avoid spraying vegetation directly. Avoid excessive wetting of asphalt. Application is prohibited directly to sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. All outdoor spray applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses: 1. Applications to underside of eaves, soffits, doors, or windows permanently protected from rainfall by a covering, overhang, awning, or other structure; 2. Applications to vertical surfaces directly above pervious surfaces, (such as soil, lawn, turf, mulch or other vegetation) only if the pervious surface does not drain into ditches, storm drains, gutters, or surface waters. Spot treatments must not exceed two square feet in size (for example, 2 ft. by 1 ft. or 4 ft. by 0.5 ft.). Do not spray the product into fish pools, ponds, streams, or lakes. Do not apply directly to sewers or storm drains, or to any area like a drain or gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. Do not apply directly to impervious horizontal surfaces such as sidewalks, driveways, and patios except as a spot or crack-and-crevice treatment. Do not apply or irrigate after application to the point of runoff. Do not make applications during rain. Avoid making applications when rainfall is expected before the product has sufficient time to dry (minimum 4 hours). Rainfall within 24 hours after application may cause unintended runoff of pesticide application. Do not apply when the wind speed is greater than 15 mph. Treat surfaces to ensure thorough coverage but avoid runoff. To treat insects harbored in voids and cracks-and-crevices, applications must be made in such a manner to limit dripping and avoid runoff onto untreated structural surfaces and plants.

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry place away from fire, sparks, and heated surfaces. **DISPOSAL:** Do Not Puncture or Incinerate! **If Empty:** This container may be recycled in the few but growing number of communities where steel aerosol can recycling is available. Before offering for recycling, empty the container by using the product according to the label. If recycling is not available, put in trash. **If Partially Filled:** Call your local solid waste agency or 800-529-3394 for disposal instructions.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

FIRST AID

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **If Swallowed:** Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 800-559-5252 for emergency medical treatment information. **Note to Physician:** Contains petroleum distillate - vomiting may cause aspiration pneumonia. **ENVIRONMENTAL HAZARDS:** This product is extremely toxic to fish and aquatic invertebrates. Do not apply directly to or near water. Drift and run-off may be hazardous to fish in water adjacent to treated areas. See Directions for Use for additional precautions and requirements. **PHYSICAL OR CHEMICAL HAZARDS: EXTREMELY FLAMMABLE. CONTENTS UNDER PRESSURE.** Keep away from fire, sparks, and heated surfaces. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not allow this product to come in contact with acids, bases, or other strong oxidizing materials, as a chemical incompatibility reaction may occur.

This product will not stain most surfaces.
Test in an inconspicuous area before treatment.
