RO-PEL™ Snake Repellent

RO-PEL™ Snake Repellent drives snakes away. Apply around your home, lawns, gardens, patios, porches, woodpiles, sheds and other places where snakes are unwanted. RO-PEL™ Snake Repellent is derived from plant oils, is biodegradable and can be used around pets. Its formula triggers an 'escape and avoid' reaction in snakes causing them to flee the area.

Snakes have an extra sensory organ in the roof of their mouth that sharpens their sense of smell called Jacobson's organ. When a snake flicks its tongue, it is able to gather micro scent particles from the air and bring them into this special organ. It is like 'tasting' the air to see what is nearby. When RO-PEL™ Snake Repellent is detected by a snake's acute odor perception it causes a message to be sent direct to its brain triggering an 'escape and avoid' reaction. RO-PEL™ Snake Repellent does not harm snakes but causes them to flee the area.

Directions for use:

Apply granules around the area you want to protect in a band of about 8 inches wide.

One pound of product will treat a band of 8 inches wide by 50 feet in length.

Do not water in the product and re-apply after heavy rain or after 3 weeks for best results. Do not apply on or around food crops.

Precautions:

Some snakes are poisonous. Be cautious when applying snake repellent. Do not handle snakes, approach snakes or apply snake repellent when snakes are visible.

First Aid

Product can cause moderate eye irritation. For certain individuals, skin irritation may occur. In case of eye contact, flush with plenty of water. In case of skin irritation, wash area thoroughly with soap and water. Seek medical attention if irritation persists.

Storage and Disposal:

Store only in original container, in a dry place inaccessible to children and pets.

Do not reuse this container. Place empty container in trash or offer for recycling if available.

Notice: Buyer assumes all responsibility for safety and use not in accordance with label directions.

Grant Laboratories, Inc. represents that this product qualifies for exemption from registration with the U.S. Environmental Protection Agency under FIFRA 25(b).
