Letter designation in lot code printed above or below on container identifies actual establishment.

NET WEIGHT: 25 LB (11.3 kg)

MANUFACTURED FOR: ASEPSIS, INC.  
P.O. BOX 1788, SUWANEE, GA 30024-0973

#### FOR SWIMMING POOL SHOCK TREATMENT

Don't let dull, cloudy water, strong odors and eye irritation affect your swimming experience! Use this product to keep your water brilliantly clear. As part of a pool care system, this product destroys and removes contaminants—such as perspiration and suntan oils—that can affect swimmer comfort. There's no need to pre-dissolve† this product, and it is compatible with chlorine or bromine sanitized pools.

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

1. Check all pool equipment and be sure it is working properly.
2. Backwash or clean filter following manufacturer's directions.
3. Test pH and adjust to between 7.2-7.6.
4. In chlorinated pools, add a minimum 30-40 ppm stabilizer level to reduce the effects of sunlight upon the chlorine residual. **NOTE:** Do not add stabilizer to brominated pools.
5. Test pool water for the presence of metals prior to use of this product. If any metals are present, add a stain inhibiting product to prevent the deposition of metal stains on pool surfaces.
6. When using other products as directed and in conjunction with this product, always follow directions on those products.

#### Dosage Directions

##### Shock

Following Applications Methods, apply 1 pound per 20,000 gallons of water every week or 1 pound per 10,000 gallons every 2 weeks when the pool is not in use (preferably at night). Reapply after heavy rain or heavy bather loads.

##### †Application Methods

When the maximum depth of the pool is less than 4 feet or when water is less than 65°F, pre-dissolve using Application Method B. For all other applications, use Application Method A.

#### Application Method A

1. Ensure pool circulation pump is operating. Continue to operate recirculation pump for 4-8 hours following product addition.
2. Broadcast the appropriate dosage of this product across the deep end of the pool.

**NOTE:** In pools with potentially bleachable surfaces, such as vinyl, paint, fiberglass, or colored plaster, brush the pool surface with a pool brush to ensure dissolution of the product. Never allow undissolved product to rest in contact with bleachable pool surfaces.

#### Application Method B

1. Ensure pool circulation pump is operating. Continue to operate recirculation pump for 4-8 hours after product addition.
2. Dissolve this product outdoors using a clean plastic bucket. Fill bucket with water, then add product. Use a clean plastic or wooden spoon to stir. Never add more than 1 pound of this product to less than 3 gallons of cool water. Never add water to product.
3. After dissolving this product, pour the solution around the edge of the pool while operating circulation pump.

**NOTE: NEVER MIX THIS PRODUCT WITH ANY OTHER PRODUCT.**

**Re-entry into treated swimming pool is prohibited above levels of 4 ppm chlorine due to risk of bodily injury.**

**STORAGE AND DISPOSAL:** Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed by storage or disposal. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying.

#### PRECAUTIONARY STATEMENTS:

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive.** Causes irreversible eye damage and skin burns. Harmful if inhaled, swallowed or absorbed through the skin. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Do not get in eyes, on skin, or on clothing. Avoid breathing dust or fumes. Wear safety glasses or goggles and use rubber gloves. For additional protection of skin, wear long sleeves and long pants. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

**PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT:** Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms.

**NOTE:** Buyer assumes all responsibility for safety and use not in accordance with directions.
