MOLE & GOPHER REPELLENT

GROUND PENETRATING TECHNOLOGY

Tomcat® Mole & Gopher Repellent utilizes a proprietary formulation that emulsifies the active ingredient, castor oil, so that it can be easily mixed with water. This specialized process is called "Ground Penetrating Technology" (GPT). GPT significantly improves the ability of the castor oil to mix with water and penetrate deep into the soil.

HOW TO USE

Shake well. Attach a garden hose tightly to self-dispensing container. Turn water supply on to full pressure. Adjust the spray nozzle to the "ON" position. Spray this product over mole-infested area at a rate of one quart of product per 10,000 sq. ft. (e.g., a 100 ft. by 100 ft. rectangle). Adjust the spray nozzle to "Water." Continue to spray with water for 5 minutes to soak Tomcat® Mole & Gopher Repellent into the soil.

FOR BEST RESULTS

Apply Tomcat® Mole & Gopher Repellent immediately after the presence of moles are detected. As a preventative treatment, apply in early Spring, mid-Summer and early Fall if there are moles nearby but not on your property.

PRECAUTIONS AND FIRST AID: CAUTION. Since product can cause mild eye irritation, the use of safety glasses is recommended. In case of eye contact, rinse with fresh water for 5 minutes. If irritation persists, seek medical attention. **STORAGE & DISPOSAL:** Store only in original container in a dry place inaccessible to children and pets. Do not reuse this container. Place in trash or offer for recycling if available. **NOTICE:** If extreme, heavy rainfall occurs right after application, it may be necessary to repeat application. Highly infested areas may require additional applications.

This product has not been registered by the U.S. EPA. MOTOMCO represents that this product qualifies for exemption from registration under the Federal Insecticide, Fungicide & Rodenticide Act.
