

Pure
KAPOW!

DIRECTIONS FOR USE:

KAPOW! may be sprayed on foliage to combat mites, thrips, aphids, white flies and eggs along with molds, mildews and most leaf dwelling insects. It is safe for use up until the day of harvest. KAPOW must be used between 38° F and 88° F. Use only as directed. 1 oz. treats up to 9 sq. ft.

25b Compliant. Shake vigorously prior to dilution and then again after. Ready to use. May be diluted at a 1 part KAPOW to 1 part water ratio for later stages of fruit and flower. Use warm water for best mixing results. PH your solution at 6.4. Check for leaf burn in small scale trials prior to use. For burn susceptible plants rinse with water ph'd at 6.4, 15 minutes to 1 hour after application. Apply to well hydrated plants only. Keep out of reach of children.

Store in original container in a dry place inaccessible to children and pets. Do not reuse empty container. Please Recycle or discard in trash.
