HOME PEST CONTROL

BED BUG KILLER

ODORLESS • NON-STAINING

FOR BED BUGS AND LICE

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back panel for additional Precautionary Statements

Deltamethrin	GROUP:	3A	INSECTICIDE

ACTIVE INGREDIENT:

Deltamethrin (CAS No. 52918-63-5) 0.03%

OTHER INGREDIENTS 99.97%

Total 100.00%

Net Contents: 1 Gallon (128 fl oz) (3.785 L)

HARRIS® HOME PEST CONTROL BED BUG KILLER

In case of medical emergencies or health and safety inquiries, or in case of fire, leaking or damaged containers, information may be obtained by calling 1-800-255-3924.

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Contact with product may result in transient tingling and reddening of the skin. Avoid contact with skin or clothing. Thoroughly wash with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

Environmental Hazards: This product is extremely toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

Physical or Chemical Hazards

Do not apply this product in or on electrical equipment due to possibility of shock hazard.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STOP: Read entire label before use.

General Information: Hold container upright. Do not spray up into air. Apply to surfaces only as a spot and crack and crevice treatment. Turn spray nozzle to "on" position. Hold approximately 12 inches from surface to be sprayed. Squeeze trigger to spray until surface is slightly moist, but not to the point of runoff. Over application may cause damage. Test in an inconspicuous area before applying.

Do not allow children or pets to contact treated surfaces until spray has dried. This Product's long-lasting action keeps on killing **Argentine Ants and Cockroaches *(American & German)*** for up to 18 months on non-porous surfaces and **Flies** for up to 5 months after you spray. More frequent applications may be necessary on concrete surfaces. Check these areas in 4 weeks and retreat if insect activity continues. Residual activity kills insects when they return to treated areas. This Product is intended to be used in and around residences and their immediate surroundings, such as (but not limited to): apartments, atriums, attics, automobiles, basements, bathrooms, boats, cabins, campers, carports, cat sleeping quarters, clothes storage, condominiums, decks, dens, driveways, garages, gazebos, homes, kitchens, lanais, living rooms, parlors, patios, pet sleeping areas, play rooms, porches, recreational vehicles, rooms, solariums, storage areas, sun rooms, utility rooms and verandas. Do not use in commercial food handling establishments, restaurants or other places where food is commercially prepared or processed.

INDOORS: Ants (including Argentine, Carpenter, Fire, Harvester & Pharaoh), Asian Lady Beetles (Lady Bugs), Boxelder Bugs, Centipedes, Cockroaches (American & German, including adult and immature stages of both non-resistant and organophosphate and carbamate resistant strains), Crickets, Dermestids, Firebrats, Fleas, Kudzu Bugs*, Palmetto Bugs, Silverfish, Sowbugs, Stink Bugs*, Ticks and Waterbugs: Apply as a spot and crack and crevice treatment to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases and similar areas. Cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Exposed food should be covered or removed. Repeat as necessary, but not more than once per week. **Roaches:** Spray in cracks and crevices, around baseboards and other hiding places. **Ants:** Spray ant trails and around doors and windows and other places where ants enter the house. Repeat as necessary, but not more than once per week. **Carpenter Ants:** For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Spray into infested wood through existing openings. **Fleas and Ticks (including Deer Ticks which may carry Lyme Disease) on Surfaces:** Remove pet bedding and destroy or thoroughly clean. Spray pet resting quarters. ***Adult Fleas and Larvae*** contacted by spray will be killed. Put fresh bedding down once spray has dried. Do not spray animals directly. For best results, pets should be treated with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Spray rugs and carpets where infestations are bad. Delicate fabrics should be tested for staining in an inconspicuous area prior to use. **Spiders:** Apply along and behind baseboards, to window and door frames, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl. **Centipedes, Ground Beetles, Pillbugs, Scorpions, Sowbugs and Ticks:** Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found. **Asian Lady Beetles (Lady Bugs):** Spray areas where bugs crawl or are at rest, around doors windows and areas where insects can enter premises. **Contact Spray:** To kill **Ants (including Argentine, Carpenter, Crazy, Fire, Harvester and Pharaoh), Bed Bugs, Biting Midges, Black Flies, Centipedes, Chiggers, Cockroaches, Deer Flies, Fleas, Gnats, Horse Flies, Spiders (including Black Widow, Brown Recluse and Hobo), Ticks and Wasps:** Spray where insects congregate and individual pests when seen. Spray 1-2 pumps, directly contacting insects. When spray dries, insects contacted by spray will be killed. **Bed Bugs and Lice:** Remove linens and wash before reuse. Lightly spray mattresses, especially tufts, folds and edges. Apply to the interior of the frame. Allow to dry before remaking bed.

OUTDOORS: Remove all exposed food and cooking utensils. Cover all food handling surfaces or thoroughly wash after treatment and before use. Do not use on edible crops. Do not make applications during rain. Do not water the treated area to the point of run-off. All outdoor applications must be limited to only spot or crack & crevice treatments, except for the following permitted uses: 1) Applications to soil or vegetation around structures; 2) Applications to lawns, turf and other vegetation; and 3) Applications to building foundations up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as driveways, sidewalks, patios, porches and structural surfaces (such as doors, eaves and windows) are limited only to spot and crack & crevice applications. Application is prohibited directly into sewers, drains or any area like a gutter where drainage to aquatic habitat, sewers, storm drains or water bodies can occur. Do not allow the product to enter any drain during or after application.

For outdoor use only as an aid in controlling these insects. Point sprayer away from face. Hold sprayer on a slight downward angle, approximately 12 inches from surface to be sprayed. Spray with wind if breeze is blowing. Do not contaminate fish ponds or apply directly to water.

PESTS ON OUTSIDE SURFACES OF BUILDINGS: For control of building infestation to Ants, Clover Mites, Crickets, Spotted Lanternflies, Kudzu Bugs*, Sowbugs (Pillbugs) and Stink Bugs*: Spray foundation of building where insects are active and may find entrance up to a height of 2-3 feet. Apply to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps. Repeat treatment as necessary, but not more than once per week. **CRAWLING INSECTS: Ants, Cockroaches (including American, Asian and German), Centipedes, Crickets, Kudzu Bugs*, Mole Crickets, Silverfish, Stink Bugs* and Waterbugs:** Hold sprayer 12-18 inches from surfaces to be treated and spray in infested surface of patio or picnic areas, hitting as many insects as possible. Spray to slightly moisten the surfaces. **Ants:** Freely spray around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, steps, etc. Break apart accessible nests and freely spray on and around debris. Repeat as necessary, but not more than once per week. **Asian Lady Beetles (Lady Bugs):** Spray areas where bugs crawl or rest, especially around doors, on and around screens, windows, doorframes and areas where bugs can enter premises. Remove screens prior to spraying them, allow to dry and then reinstall them. **Crickets, Dog Ticks, Fleas and Lone Star Ticks:** Thoroughly apply to infestation in bushes, grass or weeds. **Bees, Hornets, Wasps, and Yellow Jackets:** Spray nests and other surfaces where bees may rest. Aim spray at nest openings. Applications should be made late in the evening when insects are at rest. **FLYING INSECTS: Houseflies, Gnats, Kudzu Bugs*, Mosquitoes, Small Flying Moths and Stink Bugs*:** Spray outside surfaces of window and door frames and other areas where these pests may enter the home. Also spray localized resting areas, such as under eaves, porches, surfaces around light fixtures and cords, railings, etc. where these insects may rest. Insects coming to rest on treated surfaces will be killed. **Carpenter Ants, Carpenter Bees and Termites (only for localized control):** Apply Harris® Home Pest Control to voids or channels in damaged wood of a structure; to cracks, crevices and spaces in and between wooden portions of a structure; or between wood and the foundation, in locations vulnerable to attack such as crawl spaces. For **Termites**, the purpose of such application is to kill workers or winged forms that may be present in the treated areas at the time of application. It is not recommended as sole protection against termites. For active infestations, get a professional inspection. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but are merely a supplement. For severe termite infestation, contact a professional pest control operator in your area.

STORAGE AND DISPOSAL

Pesticide Storage: Store in a cool, dry area away from children and pets and away from heat, sparks and open flame. If freezing occurs, allow product to thaw and shake well before using. Freezing does not adversely affect this product.

Pesticide Disposal: *If empty:* Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling, if available. ***If partly filled:*** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once.

By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability. **CONDITIONS:** The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of **P.F. Harris Manufacturing Company, LLC.** All such risks shall be assumed by the user or buyer.

DISCLAIMER OF WARRANTIES: P.F.
