CRABGRASS & BROADLEAF WEED KILLER

STOP! READ THE ENTIRE LABEL FIRST. **OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.**

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Precautions and Restrictions:

- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.
- Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed or for research purposes.

 DuraTurf Crabgrass Plus is not sold, distributed, or registered within the state of New York. Do not use in the state of New York.

Product Description

DuraTurf Crabgrass Plus is formulated to control most annual grasses and broadleaf weeds commonly found in home lawns. The product contains four different herbicides.

- The four herbicides combine to kill many different kinds of weeds at different stages of development.
- Grass weeds: Preemergent control of crabgrass, foxtails, and other annual grass weeds. Postemergent control of crabgrass.
- Broadleaf weeds: Preemergent control of chickweed, henbit, knotweed, shepherdspurse, spurge, woodsorrel, and other broadleaf weeds. Postemergent control of over 250 broadleaf weeds including dandelion, chickweed, thistle and clover.

2. Where To Use

DuraTurf Crabgrass Plus may be used on the following established turf species: Established Cool Season Turfgrass: Kentucky bluegrass, rough bluegrass (Poa trivialis), perennial ryegrass, fine fescues, tall fescue, seashore paspalum Established Warm Season Turfgrass: Bermudagrass, buffalograss, zoysiagrass

DuraTurf Crabgrass Plus may NOT be used on: annual bluegrass (Poa annua), bahiagrass, bentgrass, carpetgrass, centipedegrass, dichondra, St. Augustinegrass. Do not use this product on turfgrass where desirable clovers are present.

Guidelines to follow: The use of DuraTurf Crabgrass Plus on lawns and ornamental turfgrasses that are not well established, or have been weakened by stress due to mechanical operations, chemical injury, disease, insects, pests, excessive temperatures, or lack of moisture may increase the chances for turfgrass injury. Allow turfgrass weakened by these stresses to recover before application of this product.

WEEDS CONTROLLED

When applied as directed, this product will control and/or suppress* the following weeds: Annual Grass Weeds:

Annual bluegrass (*Poa annua*) Annual ryegrass

Wormseed Yarrow. common 3. When To Apply:

This product may be applied as a single application or as split applications in the spring, early summer, or fall.

For annual grasses such as crabgrass (smooth, southern and large) and foxtail (green, yellow, and giant): Apply in the spring and early summer. For best results, apply this product from 2 weeks before weed germination until the weed is 4 inches tall. For dense populations, make a second application no sooner than 30 days after the first application.

For broadleaf weed control: Spring applications: for Dandelion, white clover, Broadleaf plantain, Woodsorrel. Fall applications: for common chickweed, Oxalis, Henbit. For best results, apply when broadleaf weeds are young and actively growing with adequate soil moisture and favorable temperatures (50° to 80°F).

4. How To Apply

- This product needs to stick to the leaves of broadleaf weeds and should be applied when the grass is wet from dew or rain.
- Poor results will occur if applied to dry lawns. When dry conditions exist, irrigate or water the turfgrass 24 hours before application.
- For best results, irrigate after the application. However do not irrigate or water sooner than 24 hours after application.

Apply this product when the wind is calm.

Do not spread granules onto flowers, vegetables, and ornamental shrubbery.

- Turf species listed on this label can be seeded, sodded, sprigged, or plugged into the treated areas 4 weeks after the application of this product.
- · When treating newly planted areas, wait approximately 6 weeks after seedling emergence before applying this product.
- Delay moving 2 days before and until 3 days after the application of this product. Additional stress from low mowing heights may increase the possibility of turf injury.
- Clippings from the first three mowings should be left on the treated area. Do not use clippings from the treated areas as mulch or compost around flowers, ornamentals, trees, or in vegetable gardens.

5. How Much To Use

Use a drop or rotary spreader designed to apply granular herbicides. Avoid skips or excessive overlaps as poor weed control or turfgrass injury may result.

Apply 2.4 pounds of product per 1,000 sq. ft. per application to established turfgrass. The maximum broadcast application rate is 2.4 pounds of product per 1,000 sq. ft. per application. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum annual (seasonal) rate is 4.8 pounds of product per 1,000 sq. ft.

SUGGESTED SPREADER SETTINGS			
Drop Spreader		Rotary Spreaders	
Scotts AccuGreen	5	Scotts Deluxe	4
Republic EZ #530	4	Republic EZ #540	3
Sears Drop	5	Earthway	8
	·	Sears Rotary	4

The above spreader settings are approximate. The age and condition of spreader, speed of operation and evenness of terrain may require slightly different settings for desired coverage.

CALIBRATION INSTRUCTIONS

• For 2.4 pounds of product per 1,000 square feet of turfgrass: Check your spreader on 420 square feet and adjust to apply at the rate of 1 pound of product per 420 square feet.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal. PESTICIDE STORAGE: Keep in original container in a cool, dry area, away from extreme heat and cold.
PESTICIDE DISPOSAL AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this bag. oblication equipment. **It empty:** Place pag in trash or offer emp ly bag for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

FIRST AID Hold eye open and rinse slowly and gently with water for 15 - 20 minutes.
Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. If in eyes: Call a poison control center or doctor for treatment advice. If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
Take off contaminated clothing.
Rinse skin immediately with plenty of water for 15 to 20 minutes.
Call a poison control center or doctor for treatment advice. If on skin or on clothing:

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information in case of emergency, call toll free 1-800-858-7378.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION - Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wear long-sleeved shirt and long pants, shoes plus socks and gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage

These chemicals (2,4-D and dicamba) have properties and characteristics associated with chemicals detected in groundwater. The use of these chemicals in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.
