1 CONTAINS SYRINGE

COMBAT MAX®

- ✓ Kills Quickly
- ✓ Easy To Use
- ✓ No Vapors Or Fumes

ROACH KILLING GEL

HOW COMBAT MAX® ROACH KILLING GEL WORKS:

The gel attracts roaches in search of food and water to the bait. Roaches ingest the bait and return to die in their nest.
El gel atrae las cucarachas que buscan comida y agua. Las cucarachas ingieren el gel y vuelven a su nido para morir.

DIRECTIONS FOR USE: IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.
DO NOT USE FOR CONTROL OF INSECTS OTHER THAN THOSE LISTED ON THIS LABEL.
SEE THE ENTIRE LABEL INSIDE THIS PACKAGE FOR COMPLETE DIRECTIONS.
CONSULTE LA ETIQUETA COMPLETA EN EL INTERIOR DEL ENVASE PARA OBTENER TODAS LAS INSTRUCCIONES.

Do not apply gel to areas that have recently been sprayed with insecticide, and do not spray insecticide over gel as it may cause the bait to become repellent.
Do not apply gel to surfaces where food is handled or prepared. Do not contaminate food or utensils with gel.

FOR INDOOR USE:

1. To apply gel: Remove cap from tip, touch tip to surface and depress plunger. Gel can be applied only as spots or in a line along cracks or crevices. For first application, apply gel in 4 dime-sized spots or several 1½ to 6-inch lines per square yard. Recap tube after use.
2. Place many spots or dabs of gel near areas of roach traffic and suspected nesting areas. Gel can be placed in cracks, crevices, corners and spots where roaches occur.
3. Inspect gel after one month and reapply if it is no longer visible. Refresh with a new application after 3 months. Gel cleans up with a damp paper towel. Discard towel after use.

FOR OUTDOOR USE (adjacent to home or structure):

Place gel in areas adjacent to structures where roaches may nest or breed. Apply gel to places where roaches may enter your home, such as eaves, sills and expansion joints. Apply gel in protected areas whenever possible, as direct sunlight and water will reduce the residual effectiveness. Inspect gel after one month and reapply if no longer visible. Refresh with a new application after 3 months.

STORAGE AND DISPOSAL: **PESTICIDE STORAGE:** Store in a cool, dry area out of reach of children. **CONTAINER HANDLING:** **If empty:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. If recycling is not available, place in trash. **If partially filled:** Call your local solid waste agency for disposal instructions.

Product may stain textiles and clothing. Keep gel away from foods and food contact surfaces.

PRECAUTIONARY STATEMENTS: **HAZARDS TO HUMANS AND DOMESTIC ANIMALS.** **CAUTION:** Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes and clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. **FIRST AID: IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of soap and water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice. **IF IN EYES:** Hold eye open, rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-426-6228 for emergency medical treatment information. **PHYSICAL OR CHEMICAL HAZARDS:** Do not use this product in or on electrical equipment due to the possibility of a shock hazard.

NET WT 2.1 OZ (60g)

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not use for control of insects other than those listed on this label.

COMBAT MAX® Roach Killing Gel may be used as a spot or crack and crevice treatment for the indoor and outdoor (adjacent to homes & structures) control of cockroaches in residential areas.

Application rate is dependent on level of infestation and species to be controlled. Gel can be applied only as spots or as a bead or in a line or in a strip in cracks and crevices. The lower application rate should be used for low to moderate infestations or re-treatments, and the higher rate for more severe infestations or where the population occurs in inaccessible areas, such as in walls. Gel placements should be made at or near areas of roach traffic, and suspected nesting areas, such as corners, cracks and crevices. Numerous smaller placements will provide faster control than fewer larger spots, especially for German cockroach control.

LEVEL OF INFESTATION OR SPECIES	APPLICATION RATE (PER SQ. YD.)
MODERATE INFESTATIONS OR RE-TREATS FOR GERMAN OR BROWN-BANDED ROACHES	1 - 2 SPOTS (DIME-SIZED) OR 1½" - 3" BEAD (LINE/STRIP)
SEVERE OR HEAVY INFESTATIONS FOR GERMAN OR BROWN-BANDED ROACHES	2 - 4 SPOTS (DIME-SIZED) OR 3" - 6" BEAD (LINE/STRIP)
LARGE ROACHES SUCH AS AMERICAN, SMOKEY-BROWN OR ORIENTAL	

Do not apply gel to areas that have recently been sprayed with insecticide, and do not spray insecticide over gel as it may cause the bait to become repellent. Do not apply gel to surfaces where food is handled or prepared. Do not contaminate food or utensils with gel.

FOR INDOOR USE:

1. To apply gel: Remove cap from tip, touch tip to surface and depress plunger. Gel can be applied only as spots or as a bead or in a line or in a strip along cracks or crevices. For first application, apply gel in 4 dime-sized spots or several 1½ to 6-inch beads or strips per square yard. Recap tube after use.
2. Place many spots or dabs of gel near areas of roach traffic and suspected nesting areas. Gel can be placed in cracks, crevices, corners and spots where roaches occur.
3. Inspect gel after one month and reapply if no longer visible. Refresh with a new application after 3 months. Gel cleans up with a damp paper towel. Discard towel after use.

MODO DE EMPLEO:

SE CONSIDERA UNA VIOLACIÓN DE LA LEY FEDERAL EL USO DE ESTE PRODUCTO CON OTRO FINES QUE LOS INDICADOS EN ESTA ETIQUETA. No lo use para el control de insectos distintos a los indicados en esta etiqueta.

El GEL MATA CUCARACHAS COMBAT MAX® puede usarse en grietas y fisuras para el control de cucarachas en interiores y exteriores (cerca de casas y estructuras) en áreas residenciales.

La dosificación depende del nivel de infestación y de la especie de cucaracha que se quiere controlar. El gel se puede aplicar sólo como puntos o en una línea en grietas y fisuras. Debe usarse una dosificación menor para infestaciones bajas a moderadas o para retratamientos, y una dosificación más alta para infestaciones más graves o cuando la población se encuentre en áreas inaccesibles, como entre paredes. La colocación del gel se debe realizar en áreas o cerca de áreas de tránsito de las cucarachas, así como donde se sospeche que haya zonas de nidos, como rincones, grietas o fisuras. Numerosas colocaciones más pequeñas brindarán un control más rápido que unos pocos puntos más grandes, especialmente para el control de la cucaracha alemana.

NIVEL DE INFESTACIÓN O ESPECIE	DOSIFICACIÓN (POR YARDA CUADRADA)
INFESTACIONES MODERADAS O RETRATAMIENTOS PARA CUCARACHAS ALEMANAS O DE BANDA MARRÓN	1 - 2 puntos (del tamaño de una moneda pequeña) O EN CUENTAS de 1½" - 3" (UNA LÍNEA/TIRA)
INFESTACIONES GRAVES O MASIVAS PARA CUCARACHAS ALEMANAS O DE BANDA MARRÓN	2 - 4 puntos (del tamaño de una moneda pequeña) O EN CUENTAS de 3" - 6" (UNA LÍNEA/TIRA)
CUCARACHAS GRANDES COMO LAS AMERICANAS, CAFÉ AHUMADAS U ORIENTALES.	

No aplique gel en áreas que se hayan rociado recientemente con insecticida y no rocié insecticida sobre el gel, ya que eso podría hacer que el cebo pierda su efectividad. No aplique gel sobre superficies en donde se manipule o prepare comida. No contamine alimentos o utensilios con el gel.

PARA SU USO EN INTERIORES:

1. Para aplicar el gel: retire la tapa del extremo, apoye la punta en la superficie y presione el émbolo. El gel se puede aplicar como puntos o en una línea a lo largo de grietas y fisuras. Para la primera aplicación, coloque 4 puntos de gel del tamaño de una moneda pequeña o varias cuentas o tiras de 1½ a 6 pulgadas por yarda cuadrada. Vuelva a tapar el tubo después de cada uso.
2. Coloque varios puntos o gotas de gel cerca de las áreas de tránsito de las cucarachas y donde sospeche que haya zonas de nidos. El gel se puede colocar en grietas, fisuras, rincones y zonas en que haya cucarachas.
3. Inspeccioné el gel una vez que haya pasado un mes y vuelva a aplicarlo si ya no es visible. Renueve con otra aplicación luego de 3 meses. El gel se puede limpiar con una toalla de papel húmeda. Deseche la toalla después de usarla.

PARA USO EN EXTERIORES (adyacentes a la casa o estructura): coloque gel en áreas cerca de las estructuras en las que encuentren las cucarachas. Aplique gel en lugares por donde pueden entrar a su casa las cucarachas, como aleros, los marcos de las ventanas y juntas de expansión. Aplique en las áreas protegidas siempre que sea posible, ya que la luz solar directa y el agua reducirán la efectividad residual. Inspeccioné el gel una vez que haya pasado un mes y vuelva a aplicarlo si ya no es visible. Renueve con otra aplicación luego de 3 meses.

DONDE COLOCAR EL GEL

Principales zonas de colocación

Otras áreas de colocación recomendadas

Cocina | Baño | Otros lugares

Este producto puede manchar la ropa y otros textiles. Mantenga el gel lejos de alimentos y de superficies en contacto con alimentos.
MEDIDAS DE PRECAUCIÓN: PELIGROS PARA HUMANOS Y ANIMALES DOMÉSTICOS.
PRECAUCIÓN: Nocivo si se absorbe por la piel. Causa irritación moderada en los ojos. Evite el contacto con piel, ojos y ropa. Lávese bien con jabón y agua luego de manipular el producto y antes de comer, beber, mascar chicle, usar tabaco o ir al baño. **PRIMEROS AUXILIOS:** SI ENTRA EN CONTACTO CON LA PIEL O LA ROPA: Quítese la ropa contaminada. Enjuague la piel inmediatamente con abundante agua y jabón durante 15 o 20 minutos. Llame a un centro de control toxicológico o a un médico para recibir consejo sobre el tratamiento. SI ENTRA EN CONTACTO CON LOS OJOS: Mantenga el ojo abierto, enjuague lenta y suavemente con agua durante 15 o 20 minutos. Si usa lentes de contacto, quíteselos luego de transcurrir los primeros 5 minutos, y continúe enjuagando el ojo. Llame a un centro de control toxicológico o a un médico para recibir consejo sobre el tratamiento. Tenga a la mano el envase o la etiqueta del producto cuando llame al centro de control toxicológico o a un médico para recibir consejo sobre el tratamiento. También puede llamar al 1-800-426-6228 para obtener información sobre tratamiento médico de emergencia. **PELIGROS FÍSICOS O QUÍMICOS:** No use este producto dentro o sobre equipos eléctricos debido a la posibilidad de riesgo de descarga eléctrica. **ALMACENAMIENTO Y ELIMINACIÓN: ALMACENAMIENTO DEL PESTICIDA:** Guarde el producto en un lugar fresco y seco, fuera del alcance de los niños. **MANIPULACIÓN DEL ENVASE: Envase vacío:** el envase no es recargable. No se puede volver a usar o rellenar. Ofrézcalo para reciclar, si el servicio se encuentra disponible. Si no existe un servicio de reciclado disponible, colocar en la basura. **Envase semivacío:** Llame al servicio de residuos sólidos local para obtener instrucciones acerca del método de eliminación.
Si tiene preguntas o comentarios, llame a la línea de ayuda de Combat® al 1-800-426-6228 para obtener información.
