

99807-15001\_Method 1-pps\_20150326\_1\_99807\_.pdf

**Directions for mixing:**

Shake well before mixing. 16 oz of **Method 1-pps** will make 2 gallons of ready to use full strength product when mixed with water. That equates to 2 oz of **Method 1-pps** to make 32 oz ready to use. First put **Method 1-pps** into an appropriate container and add water (chlorine free for best results). Shake well to complete mixing.

**Directions for use:**

Add **Method 1-pps** into a sprayer. Spray the entire plant thoroughly until the spray is dripping off. Focus on the underside of the leaves first and try for 100% coverage. If you see active pests spray the plants once every three days in a 12 day period at full strength. Then revert to the 7 day application interval. This product is most effective when applied on a 7 day interval throughout the growth cycle. It can be diluted up to 1/2 for seven day interval applications when no pests are present.

**Active Ingredients:**

Rosemary Oil 7%, Peppermint Oil 3%

Other Ingredients: 90%

Lauric Acid, Polyglyceryl Oleate, Organic Hemp Seed Oil, Water  
Total 100%

**16 fl. Oz (473.12mL)**

# Method 1-pps

**Plant Protection System  
Concentrate makes 2 - 8 gallons of spray**

**Controls spider mites, mold, and  
mildew. Kills spider mites on contact  
and your plants will love it.  
For use on feed and food crops.**
