

GARDENING TIPS:

Proper maintenance is the secret of success in every garden. To keep it disease and pest free, the gardener should inspect his/her plants at least 15 minutes a day as a precautionary measure, and also spray foliage periodically (at least once a week) for preventative measures. A good gardening habit is to assume that a garden is infected and treat it accordingly to prevent the unseen.

FACT ABOUT PLANTS:

A Plant breathes through its leaves in a process called photosynthesis. A plant leaf should be cleared at all times just like a human's nostril is in order to flourish and mature into a robust plant. Therefore it is essential that plant leaves are cleaned and sprayed at all times.

All PER - PLUS is not registered with the US Federal Environmental Protection Agency since it qualifies for exemption under FIFRA section 25(b) as a minimum risk pesticide.

ABOUT OUR PRODUCT

Our key ingredients are derived from the natural elements of plants, with no chemicals added as is intended by nature. **ALL PER-PLUS** is not harmful to smell or touch. Its components are essential for humans and plants alike as we are one with nature.

ALL PER-PLUS helps to build and heal the plant's immune system through its roots and leaves. It can be used through any stage of growth.

Your plants will appreciate it, and will definitely show it.

FACT ABOUT ESSENTIAL OILS:

"We use carefully selected oils that don't interact with each other."

A person should never purchase essential oil unless its been kept in an amber/cobalt blue glass or plastic (pet/Pete) container because of the oil losing its potency through penetration of sunlight rays. Essential oils should never be kept in HDPE plastics. Anything less is uncivilized.

ACCEPT NO SUBSTITUTE!!!

INGREDIENTS:
