VOLE REPELLENT

- All Organic Ingredients
- Non-toxic
- Environmentally Safe!

Vole Scram Professional is an organic, granular repellent used to reduce and eliminate Voles from your lawn. Vole Scram Pro will safely and naturally stop vole infestation when used as directed. **Apply Vole Scram with a broadcast spreader using the settings below or apply by hand with scoop in beds, mulch or rough grass. Early Sept, Early Oct. apply a 20 foot band to the perimeter of the property where voles are nesting during the summer months. This will help reduce voles from entering the property. DIRECTIONS FOR NORTHERN SNOWFALL REGIONS: 1st Application (Late October After Irrigation Is Off) Apply to areas that have repeated winter vole infestation each year. 2nd Application (November - 14 Days After 1st Application) Re-apply to the same areas prior to snowfall (Voles problems seem to be heaviest in areas where snow drifting occurs) 3rd Application (Early Spring/Late Winter) Apply immediately after snow melt.**

DIRECTIONS FOR MIDWEST & SOUTHERN REGIONS: Apply 2 applications, 2 weeks apart, to areas that are showing vole damage. Repeat again 30 days after 2nd application.
