EASY TO USE • CONTAINS BOTH FOOD & WATER SOURCES FOR ANTS

NO SPILL ANT KILL™

MAGGIE'S FARM™ Simply Effective™

NO SPILL ANT KILL™

Maggie's Farm™ Simply Effective™ No Spill Ant Kill™ is a patented, "rigid gel" formulation (like gelatin). The rigid gel contains a high moisture content, like liquid bait, yet remains rigid at temperatures up to 130 °F. Since ants can walk on top of the bait, more ants can feed at one time.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

***Kills:** Ants (except carpenter ants, fire ants and harvester ants)

For Use in and Around: Homes, apartments, institutional buildings, schools, warehouses, storage areas, mobile homes, boats, military bases, theaters and nursing homes.

Ant Control and Elimination: Ants will initially feed in large numbers, but then disappear. No Spill Ant Kill is designed to allow worker ants to take the product back to the nest and deliver it to the rest of the colony. Monitor the bait placements and ensure there is always a fresh supply of No Spill Ant Kill at each placement.

Easy to Open

Remove the sticker on the bottom of the station to expose the hole where ants will enter and exit the station.

Place the station with the hole facing down.

Indoor Use

Place stations in areas inaccessible to children and pets where ants are seen. Ants often trail along structural edges and will seek out moisture and food. Bait around sinks, tubs, window sills, under food cabinets, around floor edges and in corners. Use numerous bait placements, rather than fewer large placements. Often, invading ants nest outdoors. It will help to bait outside, close to where ants are found entering the structure. Ants normally follow specific trails from the nest to food or water. Placing No Spill Ant Kill stations close to these trails will improve control.

Outdoor Use

Environmental Hazards: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high-water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

Outdoor Baiting: Locate areas around the building where ants are seen trailing. Apply No Spill Ant Kill in areas inaccessible to children and pets. For a perimeter defense system, place bait stations near the foundation or where ant trails are found. Spacing the bait stations every 5 to 10 feet around the perimeter will provide the best results. Check the bait stations regularly for activity. Remember ants will feed on No Spill Ant Kill and carry the bait back to the rest of the colony. Heavy infestations may require several bait placement refills.

Storage and Disposal

Storage: Store in a cool dry place. Do not store where children or animals may gain access.
Disposal: If Empty: Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. **If Partly Filled:** Call your local solid waste agency for disposal instructions.

Warranty Limitations and Disclaimer

Seller makes no warranty expressed or implied, concerning the use of this product other than as indicated on the label. Buyer accepts this material subject to these terms, and assumes all risk of usage and handling except when used or handled in accordance with this label. There are no expressed or implied warranties of merchantability or fitness for any particular purpose, except as specifically stated herein. To the extent consistent with applicable law, the manufacturer shall not be liable for any consequential damages based on the use of the product.
