

How This Product Works

Deer have an incredible sense of smell, over 1,000 times more sensitive than humans. This product uses that against them in several ways. Each ingredient is designed to either act on the trigeminal pain receptors present in the membranes of the eyes, mouth, nose and gut, or to elicit a fear response, both resulting in triggering the deer's natural instinct to escape/avoid. In addition, this formula disrupts the host plants normal scent that attracts the deer in the first place. No harm comes to the animal.

Treatments remain effective for up to 3 months, depending on weather and deer pressure. This product is effective throughout all 4 seasons. It is an equally great option in the winter, when spraying is impractical, as well as in season, when succulent new growth is otherwise unprotected. This product stays attached and continues to repel as the plant grows, with no need to re-apply to new growth, like most sprays.

This package contains:
1-12 fl. oz. bottle of Scent-inal® Activator and
6 -Scent-inal® diffusers and twist-ties

Bonide Products, Inc.
6301 Sulliff Road
Oriskany, NY 13424

GENERAL INFORMATION

As urban and suburban development encroaches on rural areas where deer populations are high, deer become increasingly dependent on food sources found in home landscapes and gardens.

Certain plants in particular are very alluring to deer (azaleas, hawthorne, impatiens, hibiscus, camellia, hydrangea, pittosporum, geraniums, arborvitae, daylillies, corn and pumpkins).

To protect highly palatable plants from dense deer populations, especially when few alternative foods are available, the use of exclusionary tactics (burlap, fencing, tree wrap, landscape fabric, barriers...) is also recommended.

Successful deterrence is dependent on many factors, including deer population, palatability of desired plants, availability of alternate food, weather and others. Avoid planting near oak trees, as deer love their acorns. Avoid placing bird feeders near favorite plants, as deer will come for the bird seed and stay to eat your plants.

This product is a behavior modification tool. It may need to be supplemented with other behavior modification techniques to break animals of existing bad habits.

HOW THIS PRODUCT WORKS

Deer have an incredible sense of smell, over 1,000 times more sensitive than humans. This product uses that against them in several ways. Each ingredient is designed to either act on the trigeminal pain receptors present in the membranes of the eyes, mouth, nose and gut, or to elicit a fear response, both resulting in triggering the deer's natural instinct to escape/avoid. In addition, this formula disrupts the host plants normal scent that attracts the deer in the first place. No harm comes to the animal.

Treatments remain effective for up to 3 months, depending on weather and deer pressure. This product is effective throughout all 4 seasons. It is an equally great option in the winter, when spraying is impractical, as well as in season, when succulent new growth is otherwise unprotected. This product's diffusers stay attached and continue to repel as the plant grows, with no need to re-apply to new growth, like most sprays.

DIRECTIONS FOR USE

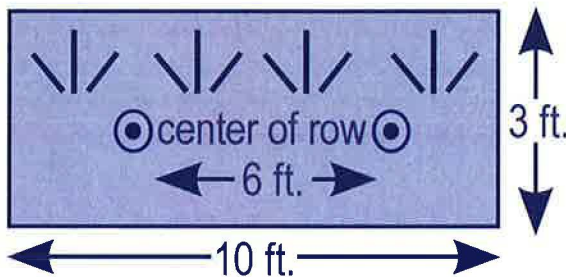

This product is designed to protect specific plants. Perimeter applications are not recommended. Using the provided twist ties, attach provided *Scent-inal*® diffusers to plants as follows:

Individual Plants:

Diameter of Plant	Number of <i>Scent-inals</i> ®*	Approximate Placement
up to 2 feet	1	center of plant
up to 6 feet	2	opposite sides of the plant
up to 18 feet	3	spaced evenly around outside edge of plant

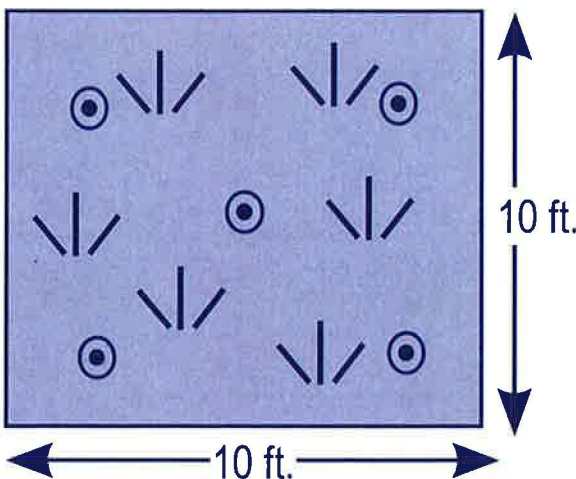

* under severe deer pressure, add more *Scent-inals* as needed and use with an area repellent such as *Repels All* and/or *Go Away!*

Linear Plant Protection

To protect a row of plants no more than 3 ft. wide, place one *Scent-inal*® every 6-10 feet.

Vegetable Gardens, Ornamental Plant Beds

Space *Scent-inals*® evenly throughout, attaching them to plants or stakes.

Note: In all cases, *Scent-inals*® work best at 2' to 4' high. In areas with heavy snowfall, keep this in mind when applying to plants in the fall before snow accumulates.

Once *Scent-inals*[®] are attached to plants, shake the bottle and remove the foil seal under the squirt top cap. Lift the spout on the cap and squirt approximately ½ fl. oz. into each *Scent-inal*[®]. Recharge and/or replace *Scent-inals*[®] as needed. Remember to add more *Scent-inals*[®] as plants grow in size. Use this product only in *Scent-inals*[®]. Do not apply this product directly to plants.

Deer can become accustomed to any one repellent consistently used over time. Rotating repellent products to prevent this is highly recommended. Bonide Repels-All and Go Away! Deer Repellent make excellent choices. Both are area repellents for the whole yard as well as garden and individual plant protection.

This product is exempt from registration with the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. Bonide represents that the ingredients qualify for exemption from registration under FIFRA.

First Aid

Product can cause moderate eye irritation. For certain individuals, skin irritation may occur. In case of eye contact, flush with plenty of water. In case of skin irritation, wash area thoroughly with soap and water. Seek medical attention if irritation persists.

Storage and Disposal

Store and transport in an upright position. Store only in original container, in a dry place inaccessible to children and pets. Do not reuse empty container. Discard empty container in trash.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with label directions.

SATISFACTION GUARANTEE

If not completely satisfied, please submit a refund request. Please send a copy of the receipt, the back label of the product that contains the UPC Code and a note explaining why you were dissatisfied. Send to, Bonide Products, Inc., Attn: Refund Request, 6301 Sutliff Road, Oriskany, NY 13424. Bonide will not be liable for any damage, direct or incidental. Refund or replacement product is Bonide's only obligation.
