The Pennington® UltraGreen® Difference

Pennington® UltraGreen® puts more and different fertilizers. Half of the nitrogen in this premium line™ is stabilized™, which allows grass to use more of the nutrients you put down and reduces nutrient loss to the environment. The other half of the nitrogen is slow-release, which extends feeding for up to 3 months.

Benefits of Pennington® UltraGreen® Crabgrass Preventer Plus Fertilizer 30-0-4

- Prevent crabgrass and fertilize your lawn in one application
- Quick greening and extended feeding
- Up to 5 months of weed grass control
- Phosphorus Free- Helping Reduce Phosphorus in Water Sources

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye injury (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid swallowing. Wash thoroughly with soap and water after handling. Prolonged or repeated skin contact with product may cause allergic reactions in some individuals.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

MINIMUM AND MAXIMUM APPLICATION RATES (by Turf Grass Species)¹

Turf Species	Minimum Rate	Maximum Rate
Bahagrass; CentipedeGrass; BermudaGrass; ZoysiaGrass; Seashore Paspalum, Tall Fescue (Including turf-type)	4 pounds per 1000 sq. ft. (175 lbs/acre)	6 pounds/1000 sq. ft. per year (259 lbs/acre per year)
Buffalograss; Kentucky Bluegrass; Perennial Ryegrass	2 pounds per 1000 sq. ft. (87.5 lbs/acre)	4 pounds/1000 sq. ft. per year (173 lbs/acre per year)
Creeping Red Fescue	1.5 pounds per 1000 sq. ft. (65.3 lbs/acre)	2.9 pounds/1000 sq. ft. per year (130 lbs/acre per year)
Creeping Bentgrass	1.5 pounds per 1000 sq. ft. (65.3 lbs/acre)	2.5 pounds/1000 sq. ft. per year (112 lbs/acre per year)

¹ These are maximum rates per calendar year. ² In Florida, Do not exceed 2 applications per year to Bahagrass and CentipedeGrass in the north. Do not exceed 3 applications per year to CentipedeGrass in the central and south regions. Consult your State Cooperative Extension Service for current information on annual application limitations for lawn fertilizers in your region.

SPREADER SETTINGS / AJUSTE DEL ESPARCIDOR

Spreader	Setting / Ajuste (2.5 pounds per 1000 sq. ft.)
Scott's® Drop Spreaders	2 ¼
Scott's® Broadcast Spreaders	3 ½
Sta-Green® Broadcast Spreader	3
Pennington® Broadcast Spreader	3

SETTING YOUR LAWN SPREADER

THESE SETTINGS ARE A GUIDE. They were determined by landscape professionals using new spreaders. The condition of your spreader, your walking speed, the roughness of the lawn, and even the humidity can affect how fast the lawn food comes out. Watch flow rate. If fertilizer appears to be coming out either slower or faster than you are covering your lawn, adjust the setting. Close the spreader when filling, turning or stopping.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. PESTICIDE STORAGE: Store in original container in a cool, dry locked storage area out of reach of children and domestic animals.

WARRANTY

The directions for use of this product are believed to be adequate and must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Plant injury, ineffectiveness, or other unintended consequences may result due to such factors as weather conditions, presence or absence of other materials, or the manner of use or application, all of which are beyond the control of Central Garden & Pet, Garden Division, the manufacturer, or the seller.

PRECAUCIONES PARA PERSONAS Y ANIMALES DOMÉSTICOS

PRECAUCIÓN: Causa lesiones (irritación) moderada de los ojos. Dañino si se ingiere o absorbe a través de la piel. Evite el contacto con la piel, los ojos o la ropa. Evite respirar el polvo. Lávese con agua y jabón después de manipularlo.

PRECAUCIONES DE USO:

Los siguientes precauciones se aplican al uso de este producto en céspedes residenciales. La aplicación de este producto puede afectar la germinación de los céspedes y los céspedes recién sembrados. No lo aplique en tepes sembrados durante los 60 días posteriores a la siembra de semillas o hasta después de la segunda poda. No lo sueda después. Pueden producirse daños a las plantas desahesibles si se aplica el producto antes de que las raíces se hayan establecido.

INDICACIONES DE USO:

Este producto no está concebido para usar en céspedes cultivados para la venta o cualquier uso comercial como es el caso de tepes, o para la producción de fertilizantes de césped en restricción.

CUÁNDO APLICAR AL CÉSPED ASENTADO:

Este producto se debe aplicar antes de que germinen las semillas de la maleza, ya que no sirve para controlar la maleza asentada.

ESPARCIDORES POR DISPERSIÓN:

Para lograr mejores resultados, aplique en una trayectoria circular comenzando por la parte exterior y trabajando hacia el centro de la maleza.

ALMACENAJE Y DESECHO

No contamine el agua, la comida o el alimento al almacenar o desecharlo. **ALMACENAJE DEL PESTICIDA:** Almacenarlo en un área ventilada y seca y bajo llave que se encuentre lejos del alcance de los niños.

AJUSTE DEL ESPARCIDOR PARA CÉSPED

ESTOS AJUSTES SON SOLO UNA GUÍA. Y han sido determinados por jardines profesionales usando esparcidores nuevos. Las condiciones de su esparcidor, la velocidad con la que usted camina, la aspereza de su césped e incluso la humedad pueden afectar la velocidad con la que sale el nutriente de su esparcidor.
