GERMICIDAL BLEACH WIPES

*SPECIAL INSTRUCTIONS FOR CLEANING PRIOR TO DISINFECTING AGAINST Clostridium difficile SPORES. • PERSONAL PROTECTION: Wear appropriate barrier protection such as gloves, gown, mask, or eye covering. CLEANING PROCEDURE: Fecal matter /waste must be thoroughly cleaned from surfaces /objects before disinfection by application with Micro-Kill Bleach Wipes. Cleaning is to include vigorous wiping and /or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms

are to be cleaned last. Do not reuse soiled wipes. • INFECTIOUS MATERIALS DISPOSAL: Materials used in the cleaning process that may contain feces /wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

***SPECIAL INSTRUCTIONS FOR CLEANING PRIOR TO DISINFECTION AGAINST Candida auris: • PERSONAL PROTECTION: Wear appropriate barrier protection such as gloves, gowns, masks, or eye

disinfection by application with a clean cloth, mop, and/or sponge saturated with the product. Pre-cleaning is to include vigorous wiping and/or scrubbing and all visible soil is removed. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading the organism. Restrooms are to be cleaned last. Do not reuse soiled cloths. • INFECTIOUS WASTE DISPOSAL: Materials used in the cleaning process that may contain feces/wastes are

to be disposed of immediately in accordance with local regulations for infectious materials disposal.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barriers or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level

SUGGESTED AREAS OF USAGE: On Medical, Dental and Laboratory Counters, Exam Tables, Carts, Patient Care Equipment, Point-of-Care Equipment, Telephones, Sink Tops, Toilet Seats, Digital Screens, on Plastics, Glazed Porcelain, Stainless Steel, Formica, Vinyl Surfaces and Blood Glucose Meters.†

GERMICIDAL BLEACH WIPES

PRECAUTIONARY STATEMENTS

Hazards to humans and domestic animals.

CAUTION: Causes moderate eye irritation. Avoid contact with eyes and clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS: This product contains bleach. Do not use this product with other chemicals such as ammonia, toilet bowl cleaners, rust removers, or acid, as this releases hazardous gases.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal Pesticide Storage: Store in a cool, dry, and well-ventilated area away from heat, open flame, direct sunlight and inaccessible to children.

Pesticide Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

Container Handling: Dispose of wipe in the trash after use. Do not flush. Offer empty packet for recycling if available or discard in trash.

Active Ingredient: Sodium hypochlorite....

GERMICIDAL BLEACH WIPES
