Bedstraw
Bindweed
Bin

Wild aster
Wild buckwheat
Wild carrot
Wild garlic
Wild geranium
Wild ger

and other broadleaf weeds

# Broomweeu Buckhorn Buckhorn plantain

Best results are obtained when weeds are growing actively in spring or early fall. Avoid contact with desirable shrubs, plants, vegetables, or flowers: especially when applying with a rotary (spinner) type spreader. Do not reseed for at least 3 to 4 weeks after application. Do not apply to newly seeded or sodded lawn until after 3 movings. For optimum results (1) Avoid moving 1 to 2 days before and after application; (2) Apply when grass is moist (after a rain, sprinkling or devir, (1) Avoid unnecessary disturbances, including water of treated areas for 48 hours after application. Watering will wash off weed killing material, and (4) Avoid applying if rainfall is expected within 48 hours following treatment. Possible retreatment in approximately 30 days may be necessary if lawn is heavily overrun with weeds or if adverse low moisture conditions prevail and weeds are in a state of poor growth. Do not exceed recommended rates because damage to turf may occur.

NOTE: When applying to Southern Grasses - under conditions of inadequate moisture, high temperature and high humidity, over-application may cause minor transitory discoloration on Centipede and St. Augustinegrasses. It is recommended that during hot, dry conditions, application rates should be reduced 50% to avoid possible dehydration or browning of grass.

## How to Apply

This 16 pound bag should be used on 5,000 square feet. Apply evenly with a lawn spreader as a one pass application. A two pass application, criss-crossing the area at half the rate each time is also acceptables

The following settings are approximate for applying contents of this package at a suggested rate of 3.2 pounds per 1,000 square feet. These settings are furnished only as a guide. Age, spreader condition, operating speed, and unevenness of terrain can cause variation in applied rates. Settings are based on an average walking speed. Reduce setting for slower speed; raise setting for higher speed. Check your spreader on 250 square feet and adjust to apply at the rate of 0.8 pound per 250 square feet.

#### **Spreader Settings**

ONE PASS APPLICATION	
MAKE	SETTING
Cyclone Rotary	4 1/2
Earthway* Rotary	15
Sta-Green® Rotary (1-10)	3 1/2
Vigoro * Rotary (1-10)	3 V2
Scotts® EasyGreen®	22
Scotts® EdgeGuard®	4 ½
Scotts® SpeedyGreen*	4 1/2

Sweep (do not wash) all fertilizer materials from surfaces immediately after application, because certain fertilizer ingredients can cause permanent stains. Wash out spreader after each use and allow it to dry thoroughly. Treat any exposed metal spreader areas with oil to reduce corrosion.

A Lawn typically will utilize 1 to 4 pounds of nitrogen per 1,000 square feet per growing seast When used as directed, this product will supplement your regular fertilizer program by providing 0.76 pound of nitrogen per 1,000 square feet and heticide to control listed weed: Please consult your local extension office for questions regarding a regular fertilizer program

Environmental Benefits: Besides increasing property values, did you know a well-maintained lawn provides the following benefits to your home and environment:

- 8 60 x 50 3 mm produces enough oxygen for a family of 4 every 40 mm.
- 8 educes glare & reduces noise - 7 raps dust, smoke particles & other pollutants - 1 runties water & modifies temperature - Improves soil condition & controls erosion

Grass clippings and yard waste are approximately 20% of the volume in our nations landfills. To do your part to reduce this amount, leave grass clippings on your lawn. Increased mowing height and fequency will produce smaller grass clippings that will decompose more readily so nutrients go back into your lawn.
