

INSTRUCTIONS FOR USE:**Apply to a Dog or Cat:**

Sprinkle a small amount along your pet's spine and rub it into their fur against the direction of hair growth, trying to get as close to the skin as possible (using a flea comb helps). Apply well to legs and belly. Reapply after bathing. In case of severe infestations apply frequently in the beginning – even daily.

**Apply in Your Home:**

To apply to carpet, sprinkle a light coating over an area and work it in with a broom or carpet rake until it does not show, trying to get it as deep into the carpet pile as possible. After 3 days do a light vacuuming, after 3 weeks resume normal vacuuming. To apply to hardwood floors, furniture and pet bedding, sprinkle a light coating and work into cracks and crevices. Remove visible excess powder after application.

**Apply in Your Yard or Garden:**

Sprinkle in outdoor areas where your pet spends time. Use approximately one bottle per 250 square feet of yard. In areas close to the house try to get it into cracks and crevices. To apply with a sprayer, mix approximately two tablespoons of powder per gallon of water. Reapply every 2-3 weeks in target areas if flea infestation is severe, or if you live in an area with a long flea season.
