HOW TO USE

<p>Outside surfaces of buildings</p>	<p>Ants, Boxelder Bugs, Clover mites, Crickets, Earwigs, Millipedes, Sowbugs (pillbugs)</p>	<p>To help prevent infestation of buildings, treat the building foundation to a height of 2 to 3 feet, where pests are active and may find entrance. Hold sprayer two (2) to three (3) feet from surface to be treated. Spray to slightly moisten the surface. To maintain effectiveness, reapply as reinfestation occurs.</p>

For ants, thoroughly wet hills and runways. Repeat application as reinfestations occur.</p>
	<p>Boxelder Bugs, Cluster flies, Flying moths, Gnats, House flies, Mosquitoes</p>	<p>For use only as an aid in reducing annoyance from these insects. Spray outside surfaces of screens, doors, window frames or wherever these insects may enter the room. Also treat surfaces around light fixtures on porches, under patio furniture, in garages and other places where these insects alight or congregate. Repeat as necessary.</p>
	<p>Tent caterpillars</p>	<p>Application should be made when caterpillars are young and tents are first noticed. For best results, apply in the late afternoon or evening, when caterpillars have returned to their tents. Wet tents with spray on all sides.
