READ THE ENTIRE LABEL BEFORE EACH USE  
Prevent and Treat Flea and Lice Infestations

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **DO NOT ALLOW CHILDREN TO APPLY PRODUCT.** To prevent harm to you and your dog, read the entire label and package insert before each use. Follow all directions and precautionary statements carefully. Use ONLY on Dogs 7 Weeks and Older and Weighing 21-55 lbs.

**RESTRICTIONS:** Use only on dogs 7 weeks and older weighing 21-55 lbs. Do not use on other animals. Do not exceed labeled dosage amount for dogs. Do not apply more than one tube per treatment. Do not have contact or allow children to have contact with treated area until completely dry. Do not treat more than one dog per tube.

**HOW TO OPEN:** Separate foil from corner of blister package. Peel back foil and take out the tube.

**HOW TO APPLY:** Remove one applicator tube from the package. Hold applicator tube in an upright position facing away from you and your pet's face and eyes. Pull cap off tube. Turn the cap around and place other end of cap back on tube. Twist cap to break seal, then remove cap from tube. The dog should be standing for easy application. Apply the entire contents of the tube evenly to three or four spots on the top of the back from the shoulder to the base of the tail. At each spot, part the hair until the skin is visible. Place the tip of the tube on the skin and gently squeeze to expel a portion of the solution on the skin. Do not apply any excessive amount of solution at any one spot that could cause some of the solution to run off the side of the dog. Do not get this product in your dog's eyes, or allow your dog to ingest this product. Discard empty tube as described in the Storage and Disposal section. Under normal conditions this product is effective for a month. However, in case of severe flea infestation, retreatment may be necessary earlier than four weeks. Do not re-treat more often than once every seven days. After flea control is attained, return to a monthly retreatment schedule.

**Side Effects:** Monitor your dog after application. Side effects, although very rare, may include signs of skin irritations such as redness, scratching, or other signs of discomfort. Gastrointestinal signs such as vomiting or diarrhea have also been reported. If these or other side effects (such as lethargy) occur, consult your veterinarian or call 1-844-685-9173.

**DO NOT USE ON CATS.** Keep cats away from treated dogs for 24 hours. If applied to a cat or ingested by a cat, contact your veterinarian immediately.
