PATENTED & OTHER PATENTS PENDING

READY-TO-USE PRE-MEASURED BAIT TRAYS

FOR THE EFFECTIVE CONTROL OF MICE

DIRECTIONS FOR USE: DO NOT ALLOW PET MICE, GERBILS, HAMSTERS, GUINEA PIGS, OR OTHER PET RODENTS TO COME IN CONTACT WITH THIS PRODUCT. DO NOT PLACE BAIT IN AREAS ACCESSIBLE TO CHILDREN. Keep box for complete directions for use.

INDOOR USE: Prior to treatment, all likely food sources must be removed or made unavailable to mice. Place pre-measured bait trays at bait points where there are signs of mouse activity, such as fresh droppings, inside or near mice runs and feeding areas. Place approximately 6 feet apart throughout the infested area. Protect bait points from non-target animals and from water. Inspect bait points frequently and replace when empty. Replace any baits which become wet and re-site in a dry location. Replace bait trays at each bait point until there are either no more takes or no mouse activity for 48 hours.

OUTDOOR USE: Place bait trays where there are signs of mouse activity, like fresh droppings or near burrows, runways, feeding places and at points of entry around the perimeter of buildings. Place bait trays in drainpipes, open-ended boxes or under sheets of metal or wood, secured at an angle against a wall to keep the bait points dry, at intervals of approximately 6 feet, reducing to 4 feet in areas of high infestation. Protect bait points from water as the baits must be kept dry. Protect bait points from non-target animals. Inspect bait points frequently and replace any bait trays that have become wet and re-site in a dry location. Replace bait trays at each bait point until there are either no more takes or no mouse activity for 48 hours.

POST TREATMENT: When handling, always use rubber gloves. Remove all remains of bait and bait containers after treatment and dispose of safely. Apply household disinfectants or bleach solutions at recommended concentrations and contact time to dead mice, mouse droppings, nests and surrounding area. Clean the area thoroughly with paper towels or a mop. Place dead mice and soiled paper towels in a plastic bag and seal tightly. Place sealed bag into a second plastic bag and seal tightly. Dispose of bags into a covered trash can that is routinely emptied. Dispose of gloves when finished and thoroughly wash hands with soap and water.

STORAGE AND DISPOSAL: Store only in original container in a cool, dry place inaccessible to children and pets. Do not reuse empty containers. Offer for recycling if available or discard in trash.

FIRST AID: If swallowed, rinse mouth thoroughly. Drink plenty of water. Do not induce vomiting.

This product is exempt from registration under the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. ConSeal International, Inc. represents that this product and its ingredients qualify for exemption from registration under FIFRA.
