STORAGE AND DISPOSAL
 Do not contaminate water, food or feed by storage or disposal.
Pesticide Storage: Store in a dry place. Do not store where children or animals may gain access.
Container Handling and Disposal: If empty: Non-refillable containers may be recycled. Call your local solid waste agency or 1-800-CLEANUP for disposal instructions.
Recycling: If available, call your local solid waste agency or 1-800-CLEANUP for disposal instructions.

FIRST AID
If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes.
If in Mouth: Remove contact lenses, if present, after the first five minutes, then continue rinsing.
If on Skin: Wash with soap and water. For large areas, call a poison control center or doctor for treatment advice.
If Swallowed: Call a poison control center or doctor for treatment advice.
 Have the product or label with you when calling a Poison Control Center or doctor or going for treatment. In case of emergency, for additional information call 1-800-858-7378.

OUTDOOR USE
Roaches, Ants and Silverfish: Apply bait so it is out of reach of children and pets. Apply bait only in cracks, crevices, voids, holes, other inaccessible areas, and other surfaces of buildings and other structures, as well as in crawlspaces, attics, tree holes and other voids. Porches, garages, sheds, AC units and other outbuildings, fences or walls may also need treatment. Pay particular attention to cracks where insects may enter buildings and treat those areas. These areas include but are not limited to cracks around windows, doors, eaves and soffits, expansion joints, and areas where lines or pipes enter buildings. Under siding and molding are also attractive areas for insects to hide. Bait may also be applied in temper-resistant bait stations. Inspect bait every 2-4 weeks and reapply when bait is almost entirely consumed.

DIRECTIONS FOR USE
 It is a violation of federal law to use this product in a manner inconsistent with its labeling.
Use Sites: In and around structures, including, but not limited to, homes, apartments, and other man-made structures, garages, and other vehicles.
INDOOR USE
 Roaches will be best if spilled food and other debris are cleaned up before applying bait. Apply bait so it is out of reach of children and pets. Apply bait only in cracks, crevices, voids, other inaccessible areas, and non-exposed surfaces such as the undersides of furniture and fixtures and under or behind appliances. If bait contacts exposed surfaces, remove bait and wash exposed surfaces. Do not continue to eat or drink from areas that are washed down frequently, such as in cracks around the edges of food prep surfaces. Do not apply bait in areas where there is a risk of electrical shock. Do not apply bait on hot surfaces or other areas where the temperature may exceed 130° F as the bait could melt and drip.
Roaches: Apply bait in small spots about 1/2" (pea-sized) in diameter (about 0.5g). For most roach infestations, apply 10 to 20 spots per 100 square feet. Use the higher number of spots when infestations are heavy and/or when roaches are living primarily in walls or other inaccessible areas. Smaller more frequent spots are better than occasional large spots. Bait may also be applied in temper-resistant bait stations. Apply about 1 gram (3/8" size spot) in each station. Place 1-3 stations per 100 square feet in out of the way places where roaches may hide.
 Look for areas where roaches may hide or enter buildings. Some of these areas include areas where baseboards are peeling away from walls, cracks in and around equipment and appliances such as stoves, sinks, dishwashers, refrigerator legs, areas where pipes come through walls, cracks around hinges, where cabinets meet walls and electrical boxes, cracks around hinges, where cabinets meet walls and cracks leading into wall, ceiling or floor voids. Pay particular attention to cracks which lead into void areas, even small ones. Inspect bait every 2-4 weeks and reapply when bait is almost entirely consumed.
Silverfish: Apply in 0.5g (pea-sized) spots as for roaches. Apply 5-10 spots per 100 square feet. Bait areas where silverfish are seen, such as bathrooms, around bookcases, stacks of papers, or peeling wallpaper and cracks between the living space and the attic, such as around light fixtures. Inspect bait after 2-4 weeks and reapply if bait is almost entirely consumed.
Ants: Apply bait in thin (1/4" wide) lines, about 1" long in areas where ants are seen trailing. Use 2-5 lines per 100 square feet. Bait is most effective when placed as close as possible to ant nests. Bait

ROACH KILLER

Gel Bait

- Kills Small & Large Roaches
- Also Kills Common Ants Listed
- Derived from Soil Microbes

KEEP OUT OF REACH OF CHILDREN CAUTION
 Active Ingredient: Abamectin B1.....0.05%
 Other Ingredients.....99.95%
 Total.....100.00%
 See bottom panel for Precautionary Statements.
 EPA Reg. No.: 73079-11
 EPA Est. No.: 73079-MO-1

- Multiple Food Attractants
 - Kills the Queen & the Colony
- Kills acrobat, allegheny, argentine, big-headed, cornfield, crazy, ghost, little black, odorous house, pavement, pharaoh, pyramid, thief and white-footed ants.

Net Wt: 28 g (1 oz)

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals: CAUTION: Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash hands thoroughly with soap and water after use and before eating, drinking, chewing gum, using tobacco or using the toilet.
NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.
ENVIRONMENTAL HAZARDS
 To protect the environment, do not allow bait to enter or run off into storm drains, drainage ditches, gutters or surface waters.
