SHAKE WELL BEFORE USE

Precautions
- We recommend good safety practices when using any insecticide, such as avoiding contact with eyes and skin and avoiding directly breathing spray mist.
- Plant oil scents can be objectionable to some people, particularly if used in enclosed areas. To get rid of the scent, clean up the spray with water and dish soap.
- Do not apply to food, feed, plants or pets.
- Keep out of lakes, streams and ponds.
- To prevent electrical shock, do not apply the product into electrical outlets or electrical boxes, or on any bare wires.
- We have tested the product on a variety of surfaces without problems, but it is possible that the plant oils could damage some plastics or finishes or could stain some fabrics or porous surfaces, so test spray a small area first. If clean up is needed, use water and dish soap.
- Treated hard floor surfaces may be slippery when wet. Wipe away excess spray with a damp cloth or paper towel.

Physical Hazards: Contents under pressure. Keep away from heat, sparks and open flame. Exposure to temperatures above 130° Fahrenheit may cause container to burst.

First Aid: If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If any irritation persists, or if more than an incidental amount is swallowed, seek medical attention. If seeking medical treatment, have this label with you.

Storage & Disposal: Store in a cool, dry area away from heat or open flame. When container is empty, recycle if available. Dispose of partly filled container by wrapping in several layers of newspaper and placing in trash. Do not puncture or incinerate.

Limitations of Liability: Maggie's Farm Ltd makes no warranties of merchantability or fitness for any purpose except expressed on this label. Buyer assumes all responsibility for safety and use not in accordance with label directions and precautions.

Maggie's Farm Ltd represents that this product is a minimum risk pesticide and is exempt from registration under EPA FIFRA 25(b). This product is not EPA registered.

MAGGIE'S FARM Simply Effective™ ANT & ROACH KILLER

Maggie's Farm Ant & Roach Killer is proven to kill ants, Asian lady beetles, bed bugs, boxelder bugs, crickets, earwigs, fleas, ground beetles, house flies, paper wasps, pill bugs, roaches, silverfish, spiders, stink bugs, termites and ticks. Using plant oils as the active ingredients in a water-based formula, it's safe for you and your family when used as directed. Bugs are tough, but solutions should be simple and effective. Maggie's Farm is committed to offering products that are Simply Effective. It's as simple as that!

DIRECTIONS FOR USE

Always read label directions and precautions prior to use. Shake well before use and periodically during use.
This product can be used indoors and outdoors.

For optimal spraying, rotate the spray nozzle to point in the same direction as the red dot located on the top rim of the can. Point spray nozzle away from face and press button firmly to spray, holding the can upright. Do not use this product in the same area where you have used a Maggie's Farm insect bait. Baits work by the insect eating them. This product is a contact killer and repellent so you want to be sure not to repel insects from an area where you put down bait.

General Treatment: Spray to contact as many insects as possible. For best results, spray flying insects while landed and at close range. Target areas where pests congregate, enter and hide, such as under sinks and appliances, cracks along baseboards, around trash, cracks and gaps around window and door frames, and around pipes and wires that come into the building. Repeat as necessary.

Bed Bug & Flea Treatment: This product will provide contact kill of bed bugs and fleas. Before applying to mattresses or large areas in occupied rooms, ensure that the product scent is not objectionable as it may take a few days to dissipate. Use Maggie's Farm Bed Bug & Flea Killer for less fragrance. Inspect infested areas and spray any insects you find. Apply in cracks in bed frame and around baseboards, picture frames, and door and window frames in infested areas. First vacuum rugs and carpets, then apply as a surface spray in infested areas. For upholstered furniture, apply to folds, tufts and beneath seat cushions. Spray until wet but not soaking. Wash and dry bedding on high heat. Apply to tufts, seams and edges of mattresses only, not entire surface. Allow the spray to dry before using the mattress. Launder or replace infested pet bedding. For persistent infestations consult a pest control professional.

Termite Treatment: Directly spray workers and winged swarmers you see as a supplemental treatment only. This is not a substitute for a professional treatment. For any infestation of a wood-destroying pest where structural damage has occurred or could occur, consult a pest control professional.
