SHAKE WELL BEFORE USE

If clean up is needed, use water and dish soap.
- Treated hard floor surfaces may be slippery when wet. Wipe away excess spray with a damp cloth or paper towel.

Physical Hazards: Contents under pressure. Keep away from heat, sparks and open flame. Exposure to temperatures above 130° Fahrenheit may cause container to burst.

First Aid: If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If any irritation persists, or if more than an incidental amount is swallowed, seek medical attention. If seeking medical treatment, have this label with you.

Storage & Disposal: Store in a cool, dry area away from heat or open flame. When container is empty, recycle if available. Dispose of partly filled container by wrapping in several layers of newspaper and placing in trash. Do not puncture or incinerate.

Limitations of Liability: Maggie's Farm Ltd makes no warranties of merchantability or fitness for any purpose except expressed on this label. Buyer assumes all responsibility for safety and use not in accordance with label directions and precautions.

Maggie's Farm Ltd represents that this product is a minimum risk pesticide and is exempt from registration under EPA FIFRA 25(b). This product is not EPA registered.

MAGGIE'S FARM Simply Effective™ FLYING INSECT KILLER

Maggie's Farm Flying Insect Killer kills flying insects fast. Using natural plant oils as the active ingredients in a water-based formula, it's safe for you and your family when used as directed. Bugs are tough, but solutions should be simple and effective. Maggie's Farm is committed to offering products that are Simply Effective. It's as simple as that!

DIRECTIONS FOR USE

Always read label directions and precautions prior to use.
Shake well before use and periodically during use.
This product can be used indoors and outdoors.

For optimal spraying, rotate the spray nozzle to point in the same direction as the red dot located on the top rim of the can. Point spray nozzle away from face and press button firmly to spray, holding the can upright.

Flying Insect Treatment: To kill house flies, red and dark-eyed fruit flies, gnats, midges, mosquitoes, bottle flies, face flies and pantry moths, direct spray at flying insects and contact as many as possible. Spray in short 2 - 3 second bursts. For best results, spray insects when they are resting to get the best spray coverage possible. When using indoors, wipe up excess. Repeat as necessary.

When using outdoors, spray breeding areas such as in and around garbage cans and compost piles, and areas where pests may be entering your home. Repeat as necessary.

Precautions

- We recommend good safety practices when using any insecticide, such as avoiding contact with eyes and skin and avoiding directly breathing spray mist.
- Plant oil scents can be objectionable to some people, particularly if used in enclosed areas. To get rid of the scent, clean up the spray with water and dish soap.
- Do not apply to food, feed, plants or pets.
- Keep out of lakes, streams and ponds.
- To prevent electrical shock, do not apply the product into electrical outlets or electrical boxes, or on any bare wires.
- We have tested the product on a variety of surfaces without problems, but it is possible that the plant oils could damage some plastics or finishes or could stain some fabrics or porous surfaces, so test spray a small area first.
