

Purpose:

NUKE EM® can reduce populations of certain plant pests including Spider Mite, Whitefly, Aphid and Powdery Mildew. NUKE EM® kills larvae, juvenile and adult parasites.

Do not spray on top of or mix with other insecticides.

Mix and apply the same day.

Commercial Growers:

Match batch dates with quality control lab tests located on the Flying Skull website. Use clean spray equipment.

Directions:

1. Thoroughly shake the bottle.
2. **Indoor:** Water the growing media until a significant amount of runoff occurs.
Outdoor: Water media in pots and water field if possible.
3. **Indoor:** May be sprayed under fluorescent or LED lighting. Turn heat producing light down. Resume high intensity light when leaves are dry.
Outdoor: Apply early or late in the day. Avoid spraying mid-day.

Mixing Rates:

Normal Strength (start here then observe): Add 1 fl. oz. to 1 quart of water or 4 fl. oz. to 1 gallon of water.
Strong Strength (if needed then observe): Add 2 fl. oz. to 1 quart of water or 8 fl. oz. to 1 gallon of water.

Application Directions: **Spray leaves and stems.**

For preventative applications, use Normal Strength every 5-7 days to help prevent infestations from incoming Insects and Powdery Mildew.

For minor infestations, three (3) application days will be needed. Each application should be two to three (2-3) days apart.

For major infestations of Spider Mites, three (3) application days will be needed. Spray 2-3 times using Strong Strength on each application day; allowing plant to fully dry between sprays. Each application should be two to three (2-3) days apart.

NUKE EM® may be used prior to and the day of harvest. See website FAQ.

Spray prior to beneficial insect release.

Insecticide & Fungicide

CONCENTRATED
MAKES UP TO 8 GALLONS (30.28 LITERS)

CAUTION: Keep Out of Reach of Children

Active Ingredients **By Weight**
Citric Acid 0.05%

Inert Ingredients
